

- Mechanical Pushbutton Lock
- Single Access Code
- Deadbolt/Spring Latch/Rim Deadlocking Latch
- Thumbturn

Features

Access Control:	Mechanical pushbutton lock eliminates problems and costs associated with issuing, controlling, and collecting keys and cards. Provides fully mechanical primary or auxiliary pushbutton access control by exterior combination, while allowing free egress at all times by interior thumbturn. Deadbolt models must be manually relocked. Deadlocking latch models automatically relock each time the door closes.
No Battery:	Fully mechanical lock eliminates the material and labor expense of battery replacements
Locking Device Options:	Deadbolt—must be manually relocked Deadlocking latch—relocks automatically when door closes Rim locking latch—relocks automatically when door closes; also has latch holdback
Number of Codes:	Single access code—one easy-to-manage code for all users
Programming:	Lock is easily programmed via keypad without removing lock from the door
Handing:	Field reversible
Operation Modes:	Single credential access Latch holdback (7106 only)
Economical:	A cost effective access control solution
