

Electric Strikes

8300 Electric Strike

Works with cylindrical locksets and accommodates latchbolts up to 5/8" throw

Also available in a Complete One Box Solution

The fire rated, concealed solution for cylindrical locksets.

The 8300 Series Electric Strike is a fire rated, compact, high performance electric strike featuring a unique concealed design for use with cylindrical locksets. No cutting on the frame is required. Simply remove the existing ANSI strike plate, adjust the vertical alignment feature to the latchbolt centerline and install. Its strength is derived from a unique keeper pin locking design, enabling the 8300 to exceed the ratings of the frame, door and locking hardware. This unique electric strike is easy to install and complies with NFPA 80-07 guidelines for retrofit into fire rated frames. The 8300 accommodates latchbolts up to 5/8" throw.
