Installation Directions

CAUTION! Before connecting any device at the installation site, verify input voltage using a multimeter. Many power supplies and low voltage transformers operate at higher levels than listed. Any input voltage exceeding 10% of the solenoid rating may cause severe damage to the unit and will void the warranty.

Prepare Strike

 Select the appropriate Plug In Connector that matches system power and electrically connect as illustrated in Diagram 2. For 12V AC/DC or 16V AC, the pigtail marked "12 VDC" should be used. For 24V AC/DC, the pigtail marked "24 VDC" should be used.

 Verify that the strike is in the correct mode of operation.
This unit ships in Fail Secure mode. If you need to convert to Fail Safe see Diagram 4.

3. If using Latchbolt Monitor (LBM) see Diagram 3 to complete wiring.

Prepare Frame

 Prepare frame using appropriate template for your faceplate (see pages 3-6).

5. Attach faceplate to strike body

Finish Installing

6. Connect wires from the power source to the strike.

Install the electric strike unit in jamb cutout using the screws provided with the faceplate option kit.
