

LCN®

4000 Series

Metal templates for
easy installation

Overview

LCN is now offering metal installation templates for the 4000 Series door closers to help make installation easier; by reducing installation time with more consistent and accurate pre-drilling. The use of metal installation templates takes the guessing out of installing a door closer with labeled dimensions eliminating the use of a paper template that could shift during the door prep. These metal installation templates accommodate several different types of installation from pull side of the door to push side by providing easy to read labels on the template.

Features and benefits

- Reduced installation time with accurate markings on metal installation templates
- Pre-marked drilling holes on templates take the guess work out of the installation process
- More consistent installation with easy-to-read labeling
- Metal installation templates eliminate worry about paper template shifting
