# 1000 Series

Surface mounted closers

## Top-of-its-class performance that gets the job done

Slamming church doors mark the beginning of LCN's rich history. In 1877, our founder was hired to solve this problem for the Trinity Church in Boston, MA. It led to the world's first door check and launched the beginning of the door closer industry.

Through investment in state-of-the-art equipment, processes and people, we believe LCN will continue to provide the best solutions for our customers. Reliability means control over door speed, latch engagement and, ultimately, how well a door with an LCN closer operates in the field.

Built from the inside out, the LCN portfolio combines tougher, bolder construction with proven technology – setting the standards for reliability, longevity and value in high-use applications. To provide door closers that are free from defects and manufactured to LCN's rigorous standards, every person from the engineer to the plant floor operator plays a role in the quality control process. We own quality control as a plant – defining standards, monitoring production, conducting quality checks and responding to any needs that arise.

With millions of door closers installed in facilities across the world and backed by support at every point of interaction no matter your role in the industry, you can be confident in choosing LCN.

### 1000 Series features

- Slim line design for easy installation on narrow head frames and top rails
- Closers mount three ways – hinge side, top jamb, and stop face
- Non-handed for right and left swinging doors

## Applications

- For aluminum, hollow metal, or wood swinging doors and frames.
- Can be used with hinge or pivot mounted door.
- Mounts on 1 3/4" transom without adapter plates.
- Adapter plates and other installation accessories available for non-standard conditions.

## Features common to 1000 Series

- 1000 series closers mount three ways. Closers with regular or holdopen arm mount hinge side or top jamb. Parallel arm, closers include - 62PA SHOE required for parallel arm mount. 1450T mounts hinge side and stop face. 1460T mounts hinge side, top jamb (pull side) and stop face.
- Non-handed for right and left swinging doors.
- Closers to meet ADA reduced opening force requirements.
- Adjustable hydraulic backcheck cushions opening swing prior to 90°.
- Separate regulation of general closing speed and latching speed.

## Design assistance

LCN has been providing reliable solutions to unique door control problems since 1925. Design and specification assistance are only a phone call away. Contact LCN for assistance or technical information at 877-671-7011 or fax 800-248-1460 (Order Entry), Fax 815-879-1495 for Product Support.

## Warranty

- 30 year limited warranty (1460 Series) and 20 year limited warranty (1260 Series) on cast iron closers.
- 15 year limited warranty (1250 series) and 25 year limited warranty (1450 series) on cast aluminum closers.

See General Information catalog for full warranty details.

## Specifications

Refer to specifications section for suggested architectural specifications.

## Materials

- High strength cast iron (1260, 1460, 1460T) or cast aluminum (1250, 1450, 1450T) cylinder.
- Forged steel main arm for all EDA, CUSH, 1460HD and 1460T arms.
- One piece forged steel piston.
- Heat treated pinion.
- LCN's standard all weather fluid performs to temperature ranges from 120°F (49°C) to -30°F (-35°C).
- High efficiency, full complement, low friction bearings.
- Tamper resistant regulating screws.
- Full rack and pinion hydraulic action.
- Low friction track and roller combination for all single lever arm closers.

## Finishes

- Available in six standard or a wide selection of optional custom powder coat finishes to blend with door and frame.
- LCN's powder coat finish surpasses 100 hours of salt spray which is over four times the ANSI standard for corrosion resistance.
- Painted finishes on cast aluminum closers (1250, 1450).
- For installations where a higher level of corrosion resistance is required, LCN offers an optional Special Rust Inhibitor (SRI) pretreatment (cast iron). Closers that combine the exclusive LCN powder coat finish and the SRI pretreatment exceed the ANSI standard for corrosion resistance even further.
- Plated finishes are available as an option to accent door and frame for the 1460 Series closers.

## Listings and approvals

UL listed for self-closing doors without hold open under "swinging door closers" (GVEV) file R 1943. Tested and certified under ANSI Standard A156.4 grade one. Consult factory for details. Consult factory for other listings such as; cUL, California State Fire Marshal, Bureau of Standards and Appeals.

## Positive pressure

LCN closers have been certified for three hours by UL to be in compliance with UL 10 C. Contact LCN for specific details on door closer fire ratings.

## Fasteners

1260, 1460, 1460T series closers are shipped with: A standard Self Reaming and Tapping Screws (SRT) pack that contains Phillips head SRT screws to install the closer. 1250, 1450 and 1450T series closers are shipped with: A universal screw pack to include Self Reaming and Tapping Screws (SRT), machine and wood screws. Standard LCN Through Bolts (TB) can be installed on 1 3/4" (44 mm) thick doors with 1/4" - 20 machine screws. Optional Through Bolt (TB) sizes are available for 1 5/8" (41 mm) or 1 3/8" (35 mm) door thickness, but this must be specified when ordering.

### Notes:

- For Through Bolts, specify door thickness if other than 1 3/4" (44mm), represented in diagram as dimension "X".
- Phillips head, metric machine screws are available, please specify.
- LCN recommends the use of wood screws for wood door applications.

# 1250 Series

The 1250 Series cast aluminum closer is designed for low-frequency and low-abusive traffic areas. Combining dependable operation, low maintenance and a stylish look this closer is ideal for aluminum storefronts and interior offices.

# 1450 Series

The 1450 Series cast aluminum closer was specially designed to deliver consistent, dependable, long-term performance in frequently-used, low-abusive traffic areas. With industry's most common hole pattern it can fit a range of applications like aftermarket replacement, aluminum storefronts and new construction projects.

### Reduced opening force 1450 Series closers

**CAUTION!** Any manual door closer, including those certified by BHMA to conform to ANSI Standard A156.4, that is selected, installed and adjusted based on ADA or other reduced opening force requirements may not provide sufficient power to reliably close and latch a door.

Refer to Automatic Operators catalog for information on systems that meet reduced opening force requirements without effecting closing power.
