

History of doo closers & LCN

#### Trinity Church...

In 1876, Mr. L. C. Norton was sent to
Boston, Massachusetts to help build the
Boston Trinity Church. The church took
over four years to complete. The church
was located on the Back Bay facing south
and west thus at times, encountering some
very severe wind conditions. The church
began operation in 1880, the pastor, Rev. Brooks
and his congregation quickly found out that the strong winds
would make the doors close with a thunderous bang. Needless to
say, the pastor was not going to stand for all the noise; those doors
needed to be controlled! This prompted Mr. Norton to action.

Mr. Norton's first attempt to remedy the situation was to hang the doors on double-spring hinges. Mr. Norton had now uncovered a second problem. The slamming stopped but now the strong winds made the doors stand open. The cold, drafting air raised protest amongst the people in the church. He tried rubber stops, special door linings, and some other ideas. Nothing worked. One day, continuing to ponder the problem with the doors at the Trinity Church, he put some things away in a closet and being in a hurry, he threw the door shut. To his amazement, the door did not slam. Instead, the door bounced back. He tried this over and over with the same result. An idea came to him: he rushed to town and purchased a beer pump. With the beer pump, a makeshift arm, and some special brackets he had designed, Mr. Norton installed his invention on one of the exterior church doors. He opened the door and let it go...CRASH! The door slammed so hard it broke the pump into many pieces.

Mr. Norton spent many months trying to solve the problem; finally, he used the principles of the lever, improved the main components, and decided to reposition the device on the door. He took his updated version and again installed it on one of the troublesome church doors. Rev. Brooks saw Mr. Norton's new design and to his delight, the closer worked perfectly. Mr. Norton had used air pressure to make the doors close quietly. The problems with the doors at the Boston Trinity Church were now solved.

#### **Growing Pains...**

Soon after the doors at the Trinity Church were under control, Mr. Norton formed a company to manufacture his new found invention. The factory was located in Boston, Massachusetts and business started out strong. In fact, at times, there were more orders than production could match.

Time flew by. Mr. Norton's company began to experience difficulty. Competition was fierce. Some competitors began to infringe on patents, which drained Mr. Norton of both cash flow and other resources. Mr. Norton also made a few business decisions that would hamper company growth. The early years presented other challenges too. New closer designs were being introduced at an increasingly fast pace. This quick growth brought about some challenging quality issues. Business associates both good and bad, came and went. The factory moved to Brooklyn, New York and then back to Boston, Massachusetts. In these years, the door closer business was a volatile one. Most good companies were forced into change whether they liked it or not. The door closer industry was no exception.

#### **New Beginnings...**

Competition drove Mr.
Norton in a new direction.
His air check had worked
well but was slowly giving
way to new technology.
In 1900, Mr. Norton
developed a liquid door
check. This new liquid
door check controlled
the door through the

entire door swing by incorporating three independent hydraulic regulations. Back-check, general speed, and latch speed were necessary for total door control. In 1908, the company was moved to Chicago, Illinois. By the early 1920's, the door closer business was doing well but Mr. Norton was wearing down, he needed help.

In 1925, **Mr. L. C. Norton** teamed with **Mr. D. R. Lasier** and formed the Norton-Lasier Company. The business was located at 466 West Superior Street in Chicago, Illinois. Norton & Lasier knew that if their company was to survive, they must build a far superior product at a very fair price. They called their improved door closer an LCN. After a few years,

high-quality traditional style closers all over the world. Many of these closers are still in use today. In 1949, the factory moved to Princeton, Illinois. In 1958, LCN introduced the heavy-duty 4010/4110

series closer. Schlage Lock Company purchased LCN in 1959. In 1974, Ingersoll-Rand purchased Schlage Lock Company (and LCN). Today, LCN offers a complete line of door control products including heavy-duty hydraulic closers, power operators, fire/life safety closer/holders, high security closers & more.

The model numbers may have changed but the passion, quality, and excitement will always remain. LCN closers are made with premier materials and our products are

tested far beyond the industry requirements.

**1851** – Lewis C. Norton born May 5th in New Hampshire.

**1880** – First door closer installed at Boston Trinity Church.

**1881** – Manufacturing begins at Boston plant.

**1900** – Mr. Norton introduces a liquid door check.

**1908** – Company moves to Chicago.

**1917** – David R. Lasier joins company as timekeeper.

**1925** – Norton-Lasier Company begins operation.

**1929** – L. C. Norton moves to California. D. R. Lasier heads up company.

**1930** – Norton-Lasier Company produces wooden riding toys to cope with the Great Depression.

**1937** – L. C. Norton passes away on November 4<sup>th</sup>.

**1942** – Norton-Lasier Company produces hydraulic aircraft fittings for the war effort.

**1948** – Norton-Lasier Company officially changes name to **LCN**.

**1958** – **LCN** introduces the 4010/4110 series door closer.

**1959** – **LCN** sold to Schlage Lock Company.

**1972** – **LCN** introduces Sentronic line of fire/life safety holder/closers.

**1973** – **LCN** introduces the 4040 series door closer.

**1974** – Schlage Lock (and LCN) sold to Ingersoll-Rand.

**1978** – **LCN** introduces Equalizer units.

**1980** – Production on traditional series ends.

**1981** – **LCN** introduces the 1460 series door closer.

**1981** – **LCN** introduces AutoEqualizer<sup>™</sup> units.

**1985** – **LCN** introduces the 1070 series door closer.

**1993** – **LCN** introduces the powder coat finish.

**1995** – **LCN** introduces Electric Operator units.

**1996** – **LCN** introduces the 1520 series door closer.

**1998** – **LCN** introduces the 1370 series door closer.

**2006** – **LCN** introduces the new 4030 series door closer to replace the 1520 closer series.

2006 – LCN introduces the new Senior, Astro and

Middle Swing Digital Control Box. **2007** – **LCN** introduces the new Tri-Volt Magnets.

**2007** – **LCN** introduces the new 4040XP.

**2007** – **LCN** introduces the new 1260 Series.

 2013 – In December of 2013, the Security Technologies division of Ingersoll Rand became its own publicly traded company called Allegion.

**2015** – **LCN** introduces the 1250, 1450 and 4050 series cast aluminum door closers.

### LCN

121 West Railroad Avenue P.O. Box 100 Princeton, IL 61356-0100

For SSC Representative contact information, please visit www.allegion.com/us and click "Contact Us"

PAH60......H1

To view or download an electronic copy, visit www.allegion.com/us. LCN reserves the right to change the information contained in this catalog without notice.

LCN powder coating provides superior protection against the effects of weather conditions and is an environmentally friendly process. The high quality, chip resistant finish is far superior to any previously offered. Corrosion resistance surpasses 100 hours salt spray testing (four times the industry standard). Non-metallic components also provide the same high resistance to the effects of the elements. All LCN products must be shipped with a finish.

**ALUM ALUMINUM (BHMA 689)** 

#### DKBRZ DARK BRONZE (BHMA 695)

**STAT STATUARY BRONZE (BHMA 690)** 

**LTBRZ LIGHT BRONZE (BHMA 691)** 

**BLK** BLACK (BHMA 693)

**BRASS** BRASS (BHMA 696)

LCN offers custom powder coating to provide a custom appearance and all the corrosion resistance of standard powder coat finishes at a nominal additional cost, LCN uses the RAL numbering system for the 150+ custom colors available. Contact your local SSC representative for a brochure showing the available custom colors. Note: Custom powder coat finishes require a metal cover.

Visible components such as metal covers, arms, fasteners, and finish plates are plated to match the selected finish. Surface mounted tracks are powder coated to compliment the plated finish. Hidden assemblies such as cylinders, tracks, and mounting plates are supplied with a powder coated finish. Plated finishes require handing of closers.

US 3	Bright Brass (BHMA 632)
US 4	Satin Brass (BHMA 633)
US 10	Satin Bronze (BHMA 639)
US 11	Satin Bronze (BHMA 643)
US 15	Satin Nickel (BHMA 646)
US 26	Bright Chrome (BHMA 651)
US 26D	Satin Chrome (BHMA 652)

ALUM (BHMA 689) Aluminum Dark Bronze DKBRZ (BHMA 695)

For installations where a higher level of protection against weather conditions, or the effects of a potentially corrosive atmosphere is required, LCN offers a special rust inhibiting (SRI) process. Ferrous metal components receive an SRI pretreatment and a standard powder coat finish of your choice, or a custom powder coat finish for a nominal additional cost. Closers treated with the SRI process exceed the 100 hour protection level available with standard LCN powder coated finishes. For details, contact your local SSC representative or the LCN factory.

LCN Senior Swing & Benchmark electromechanical power operators are offered with an anodized finish. Anodizing is an electrochemical process that thickens and toughens the protective oxide on aluminum metal.

Limited Warrant

Subject to the terms and conditions of this limited warranty, Schlage Lock Company, LLC (the "Company") extends a limited warranty against defects in material and workmanship for its LCN branded product(s) identified in the Product Table below ("Products") as installed in the original location.

This limited warranty applies to Products purchased on or after March 3, 2014.

#### **Product Table - Cast Iron**

4000 Series	30 Years
1460 Series	30 Years
1260 Series	20 Years
Concealed, High Security (except 2210DPS)	15Years
Automatic Operators; SE, ME, HSA, SEH Series; SEM Magnets; 2210 DPS (includes both electronic and mechanical components)	2 Years

#### **Product Table - Cast Aluminum**

1250 Series	15 Years
1450 Series	25 Years
4050 Series	25 Years

**Term:** The limited warranty period for Products is as stated in the Product Table above. The "Commencement Date" for a limited warranty period shall be the date of Company's delivery to the original purchaser of the Products. Proof of Product purchase may be required by Company to confirm the Commencement Date.

What Company will do: Company may require proof of Product purchase in order to provide coverage under this limited warranty. As Company's only responsibility and user's only remedy under this limited warranty, Company will furnish a replacement Product upon receipt and confirmation by Company, in its sole opinion, that the Product has, in fact, failed due to a manufacturing defect under normal use and maintenance. In the event a replacement Product cannot be provided, Company will either provide a suitable replacement Product or a refund in the amount of the original purchase price.

What is not covered: The following costs, expenses, and damages are not covered by the provisions of this limited warranty: (i) labor costs including, but not limited to, such costs as removal and installation of Product; (ii) shipping and freight expenses required to return Product to Company; (iii) failures, defects, or damage caused by any third party product or service; (iv) any other incidental, consequential, indirect, special and/or punitive damages, whether based on contract, warranty, tort (including, but not limited to, strict liability or negligence), patent infringement, or otherwise, even if advised of the possibility of such damages.

The provisions of this limited warranty do not apply to Product that is: (i) not the proper size for the application for which the Product is used; (ii) not installed in accordance with Company's published Product installation instructions; (iii) installed with improper parts and/or incorrect parts (NOTE: It is recommended that Product be installed with LCN fasteners provided with Product); (iv) improperly stored, maintained, or operated; (v) modified, repaired, or altered in Company's sole opinion, in any manner, without the express written consent of Company; (vi) used for purposes for which the Product is not designed or intended; (vii) subjected to misuse, abuse, negligence, or accident; or (vii) subjected to improper temperature, humidity, or other environmental conditions.

**Note:** 900/7900 Series compressors are not manufactured by Company and are excluded from coverage under this limited warranty. For more information, parts, or repairs concerning the compressors, contact the compressor manufacturer directly at (269) 926-6171.

**Additional Terms:** This limited warranty is in lieu of all other warranties, express or implied. Company does not authorize any person to create for it any obligation or liability in connection with Product. Company's maximum liability hereunder is limited to the original purchase price of the Product. No action arising out any claimed breach of this limited warranty by Company may be brought by the user more than one (1) year after the cause of action has arisen.

**How local law applies:** This limited warranty gives you specific legal rights, and you may also have other rights as permitted by law. Some local laws do not allow limitations on how long an implied warranty lasts or the exclusions or limitation of incidental or consequential damages so the limitations or exclusions provided herein may not apply to you.

Program and Warranty Claims: If product is to be claimed to be defective under this limited warranty, contact Customer Care at (877) 671-7011.

Note: Please contact LCN Customer Care prior to returning any product back to the factory. You will need prior authorization and an RMA for your return.

Since its founding in 1926, LCN has specialized in solving door control problems through the use of high quality, innovative door control products. By adhering to high standards of performance, LCN has earned a leadership role within the industry and is committed to meeting door control challenges of the future. With representatives located throughout the world, LCN provides the products and services necessary to solve your door control problems.

Door closer specialist

### The LCN formula for success

#### **Materials**

LCN is committed to providing the best door closers in the world. In addition to the mechanical advantages derived from proven designs, much of the durability of the closer and arm system is related to the materials used in their manufacturing.

**Extensive Abuse Test** 

Why do some hardware professionals claim that LCN stands for "Last Closer Needed?" LCN closers are put through grueling tests in which they exceed industry requirements.

Forged Steel Arms

The closing power and control generated within LCN closers is transferred to the door through forged steel arms. Forged steel arms have greater strength, better appearance and less bulk.

**Chrome Silicon** 

Many closer manufacturers use less expensive oil-tempered springs, but LCN engineers know that such a spring loses up to 20% of its power after a few thousand cycles.

**Heat-Treated** 

LCN steel pinions have larger, stronger teeth and are double heat-treated for the greatest possible strength on the shaft. Heat-treating makes the pinion harder, better able to resist wear after years of service and results in less stress on the cylinder.

**Special Templates** 

When a standard door closer won't do the job, there is only one proven, reliable source for special solutions — LCN. With over 3,000 special templates on file, LCN can provide a door control solution for one-of-a-kind doors such as vault, balanced, over-sized and arch doors.

Hydraulic Fluid

LCN uses a special formula hydraulic fluid with special lubrication properties to keep closer components working smoothly. This unique all-weather hydraulic fluid eliminates the need for seasonal adjustments.

**Customer Service** 

At a time when machines are picking up more and more customer calls, real people are answering the phones at LCN. Every member of our customer service staff is trained and qualified to assist you with orders, closer selection and special applications.

Specifications

### PART 1 - GENERAL 1.1 QUALITY ASSURANCE

#### A. Reference Standards

 American National Standards Institute (ANSI/BHMA):

A117.1 Providing Accessibility and Usability for Physically Handicapped People A156.10 For Power Operated Pedestrian Doors

A156.4 Door Controls - Closers

A156.15 Life Safety Closer Holder Release Devices

A156.18 Materials and Finishes

A156.19 Power Assist and Low Energy Power

Operated Doors

2. Americans with Disabilities Act (ADA)

 American Society for Testing and Material (ASTM): Specification B117-9 Method of Finish Corrosion Testing

. Underwriters Laboratory (UL): 228 Door Closers-Holders

UL10C Standard Positive Pressure Fire

Test of Door Assemblies

UL10B Standard for Fire Test of Door Assemblies

National Fire Protection Association (NFPA)
 No. 80 Fire Doors and Windows
 No. 101 Life Safety Code

#### **B.** Source Quality Control

- Obtain each kind of hardware (latch and lock sets, hinges, closers, etc.) from only one manufacturer, although several may be indicated as offering products complying with requirements.
- All products shall meet grade 1 or the highest level of cycle test requirements of the applicable ANSI/BHMA standard.

### C. Supplier Qualifications

- Supplier must be a recognized builders hardware supplier who has been furnishing hardware in the projects vicinity for a period of not less than two years.
- Supplier must be or employ an experienced hardware consultant who is available, at reasonable times during the course of the work, for consultation about the project's hardware requirements, to Owner, Architect, and Contractor.

#### D. Fire-rated Openings

- Provide hardware for fire rated openings in compliance with NFPA Standard No. 80, NFPA Standard No. 101, and local building codes.
- [Manual hold-open arm function not allowed.] Provide hardware which has been tested and listed by UL for types and sizes of doors required and complies with the requirements of door and frame labels.

## PART 2 - PRODUCTS 2.3 MATERIALS AND FABRICATION

#### A. General

 Closers shall be installed to allow door swing as shown on plans. Doors swinging into exit corridors should provide for corridor clear width as required by codes.

#### 2.8 CLOSERS AND DOOR CONTROL DEVICES

#### A. General

All closers shall be as manufactured by LCN CLOSERS, Princeton, Illinois, USA, and shall have the following features:

- [Applies to 4010, 4020, 4110, 4210, 4510, 5010 Series only.] All manual door closers shall be certified to exceed 15 million (15,000,000) full load operating cycles by a recognized independent testing laboratory.
- 2. All closers shall carry manufacturer's warranty, as stated on page 6.
- All closers with electrical or pneumatic components shall carry a manufacturers two (2) year warranty.
   [Items 4 through 12 apply to closer cylinder, items 13
  - [Items 4 through 12 apply to closer cylinder, items 13 through 16 apply to closer arms.]
    [Delete for 1250, 1450, and 4050] Fully hydraulic, rack and
- [Delete for 1250, 1450, and 4050] Fully hydraulic, rack and pinion action with high strength cast iron cylinders and one piece forged steel pistons.
- 5. Fluid of a type requiring no seasonal adjustments.
- [Delete for 1460, 1260, 3030, 3130 4030 4040XP, 1250, 1450, and 4050 Series. 4040XP has a minimum 3/4" pinion shaft diameter.] Pinion shaft minimum diameter of 11/16".
- Hydraulic regulation controlled by tamper-proof, non-critical screw valves, adjustable with a hex wrench.
- Separate adjustments for backcheck, general speed, and latch speed.
- [Applies to 1450, 1460, 4010, 4020, 4040XP, 4050, 4110, 4210, 4510, 5010 Series.] Where detailed on double lever arm closers, provide a delayed action feature to delay closing up to one minute from maximum opening to approximately 75º.
- 10. Backcheck shall be properly located for protection of the door, frame, and applied hardware.
- 11. [Applies to 2210, 4110, 4210, 4210T, 4510, and 4510T Series only.] Where detailed, provide advanced variable backcheck to start backcheck function at approximately 45º.
- Include high efficiency, low friction full compliment pinion bearings.
- [Delete for 1260, 1460, 6030 Series.] Forged steel main arms
- 14. [Applies to 4110, 4210, 4510 Series and all EDA and CUSH arms.] Forged steel main and forearms.
- 15. [Applies to all single lever arm (track type) closers.] Where detailed, provide a quiet, low friction track and roller assembly and provisions for an optional bumper assembly to assist backcheck and/or hold-open clip.
- [Applies to all double lever arm closers, except EDA or CUSH arms.] Reversible shoe to increase latching power of the closer.

#### B. Size of Closers

- Sized in accordance with ANSI/BHMA Standard A156.4
   as shown in the applicable TABLE OF SIZES listed in the current
   LCN General Catalog.
- Closing power of non-sized cylinders shall be adjustable over a range of sizes; [Applies to 1250, 1261, 1450, 1461, 1460T, 4011, 4021, 4040SE, 4040XP, 4040XPT, 4041DEL, 4050, 4111, 4211, 4511, 4631, 4642, 4811, 4822, 4841, 4031, 4031T Cylinders.]

#### C. Barrier Free Manual Closers

- All closers for openings that must meet the minimum requirements of the ADA act, in lieu of ANSI/BHMA Standard A156.4, shall be sized in accordance with the applicable REDUCED OPENING FORCE table in the current LCN General Catalog.
- 2. All size 1 manual closers shall provide or be adjustable to provide less than 5 pounds opening force on a 36" door leaf and delay closing time in accordance with the ADA requirements.

#### D. Combination Door Closers and Holders

 Provide closer/holders designed to hold the door in the open position under normal usage and to release and automatically close the door under fire conditions. Closer will include an integral electromagnetic holder mechanism designed for use with UL listed fire detectors, provided with normally closed switching contacts.

### 2. [Applies to all ME models.]

Where detailed, multi-point closer/holders shall incorporate a hold-open bypass feature from  $0^{\circ}$  up to either  $80^{\circ}$  or  $140^{\circ}$ .

#### 3. [Applies to 4310 ME only.]

Where detailed, multi-point closer/holders shall provide a swing-free function with a no-drift feature.

#### E. High Security Closers

- 1. Provide closers designed to resist vandalism and tampering.
- 2. All exposed fasteners shall be TORX machine screws with a security pin.
- 3. All closer adjustments shall be shielded by the cover or finish plate, after installation.
- Arm and, where furnished, high security roller assembly shall be designed to prevent disassembly.
- [4210 and 4510 Series only.] All surface mounted high security closers shall include a cast iron cylinder certified by an independent testing laboratory to exceed fifteen million (15,000,000) operating cycles, heavy gauge metal covers with four mounting screws and double lever arms manufactured to prevent disassembly.
- 6. [4210T and 4510T Series only.] All surface mounted high security closers shall include a cast iron cylinder certified by an independent testing laboratory to exceed fifteen million (15,000,000) operating cycles, heavy gauge metal covers with four mounting screws, heavy duty arm with special security roller, and a heavy gauge high security track designed to eject foreign objects.

- [2210 and 2210 DPS only.] All concealed high security closers shall include a cast iron cylinder certified by an independent testing laboratory to exceed fifteen million (15,000,000) operating cycles, 3/8" steel mounting plate, heavy duty arm with special security roller, and a heavy gauge high security track designed to eject foreign objects.
- 8. **[2210 DPS only.]** A built-in door position switch shall be optional with concealed closers.

#### F. Automatic Operators

- Where low kinetic energy, as defined by ANSI/BHMA Standard 156.19, automatic operators are indicated for doors required to be accessible to the disabled. Provide pneumatic, electrohydraulic or electromechanical [2610, 2810, 2850, 2860, 4630, 4640, 4810, 4820, 4840, 9130, 9140, 9150, 9530, 9540, 9550, 9560 Series] operators complying with the ADA for opening force and time to close standards.
- Full closing force shall be provided when the power or assist cycle ends [2610, 2810, 2850, 2860, 4630, 4640, 4810, 4820, 4840, 9130, 9140, 9150, 9530, 9540, 9550, 9560 Series].
- 3. **[2610, 4810, 4820, 4840]** Locate power unit and pneumatic exhaust away from door to minimize noise and vibration in pedestrian areas.
- All automatic operator systems shall include the following features and functions.
  - a) Provisions for separate conduits to carry high and low voltage wiring in compliance with the National Electrical Code. section 725-31.
  - b) The operator will be designed to prevent damage to the mechanism if the system is actuated while the door is latched or if the door is forced closed during the opening cycle.
  - c) All covers, mounting plates and arm systems shall be powder coated and successfully pass a minimum of 100 hours testing as outlined in ANSI/BHMA Standard A156.18 [2610, 4630, 4640, 4810, 4820, 4840 Series].

-Or-

- d) Electromechanical automatic operators shall be standard anodized either in aluminum or dark bronze. Custom anodized finishes and custom paint are available and can be specified. [2810, 2850, 2860, 9130, 9140, 9150, 9530, 9540, 9550, 9560 Series]
- e) UL listed for use on labeled doors
- f) [4630, 4640, 4810, 4820, 4840 Series] shall be nonhanded with spring power over a range of at least four sizes either 1 through 4 or 2 through 5.

-Or-

g) [2810, 2850, 2860, 9130, 9140, 9150, 9530, 9540, 9550, 9560, Series] are handed and feature a spring return.

#### Specifications

- h) Provisions in the control box or module shall provide control {inputs and outputs} for; electric strike delay, auxiliary contact, sequential operations, fire alarm systems, actuators, swing side sensors, stop side sensors. [2610, 4630, 4640, 4810, 4820, 4840, 9130, 9140, 9150 Series]
- 5. **[4630, 4640 Series]** All electrohydraulic automatic operators shall include the following features or functions:
  - a) Second Chance Feature: When an obstruction or resistance to the opening swing is encountered the operator will pause at that point, then attempt to continue opening the door. If the obstruction or resistance remains, the operator will again pause the door.
  - b) Easily accessible main power and maintain hold-open switches will be provided on the operator.
  - c) An electronically controlled clutch to provide adjustable opening force.
  - d) A microprocessor to control all motor and clutch functions.
  - e) An on-board power supply capable of delivering both 12V and 24V outputs up to a maximum of 1.0 ampere combined load.
  - f) All input and output power wiring shall be protected by a resettable circuit breaker.

-Or-

- 5. All electromechanical automatic operators shall include the following features of functions:
  - a) Maximum 8-1/2 lbs of manual opening force **[9130, 9140, 9150 Series].**
  - b) Maximum 15 lbs of manual opening force [2810, 2850, 2860, 9530, 9540, 9550, 9560 Series].
  - c) Bottom loaded header for easy access to controls **[2810, 2850, 2860, 9550, 9560 Series].**
  - d) Power Boost, which adds an additional 25 lbs of closing force at latch [2810, 2850, 2860, 9130, 9140, 9150, 9530, 9540, 9550, 9560 Series].
  - e) Self contained automatic operators in a cast aluminum housing and a forged steel arm [2810, 2850, 2860, 9130, 9140, 9150, 9530, 9540, 9550, 9560 Series].

#### 2.12 HARDWARE FINISHES

#### A. Finish

- All closers with powder coat finishes shall exceed a minimum 100 hour salt spray test, as described in ANSI/BHMA Standard A156.4 and ASTM B117.
- 2. All closers detailed with plated finishes shall include plated covers (or finish plates), arms, and visible fasteners.
- All electromechanical automatic operators supplied with anodized finishes.
- 4. All closers must be shipped with a finish.

## PART 3 - EXECUTION 3.1 INSTALLATION

#### A. General

- Installation shall be in accordance with the templates and installation instructions packaged with the closers at the time of manufacture.
- Installation shall be made with fasteners packaged with the closer by the manufacturer.
- 3. All electrical connections shall be made in accordance with the manufacturers recommendations.
- 4. Clean installed closer to remove dirt, debris, and marks incidental to installation work.
- Installation instructions and templates are to be turned over to the Owners representative upon completion of the installation work
- Factory trained representative will be available for job site inspection of major projects upon completion of the hardware installation work.

#### 3.2 ADJUSTMENT

#### A. Adjustment

- Install and regulate all closers in accordance with the installation instructions packaged with the closers at the time of manufacture.
- 2. If unfamiliar with LCN products furnished, consult factory representative prior to installation for assistance.

Materials

Made from premier materials, LCN is committed to providing the best door closers in the world. In addition to the mechanical advantages derived from proven designs, much of the durability of the closer and arm system is directly related to the materials used in their manufacturing.

Precision machined **cast iron cylinders** and **forged steel pistons** work together because of the compatibility of their basic elements. **Heat-treated pinions** and **pistons** spread the load over a large gear tooth system to better handle the wear and stress of millions of operating cycles. Upper and lower full compliment pinion bearings provide the support and load capacity required by the design of the closer. **All weather fluid** eliminates the need for seasonal adjustments.

**Forged steel main arms** are superior to stamped steel arms used on closers where price is the primary concern. Specially designed shoe and elbow joints provide maintenance free service. A state-of-the-art, **powder coat** process delivers a high quality, corrosion resistant finish on all metal parts in popular architectural finishes.

LCN always uses the best materials available to provide the exceptional value and long service life that you, our customer, have every right to expect.

Proper door contro

Today practically every door in modern commercial, industrial, and institutional buildings is opened by the person passing through and closed by a mechanical door closer which keeps the door under control at all times. The power to close the door is generated by the springs inside the closer. Regulated hydraulic circuits control the speed of the doors closing swing. Ideal door "conduct" is illustrated and described in the diagram below. It can be achieved by equipping each door with the appropriate LCN door closer.

### Perfect door operation... The aim of mechanical control.

This diagram shows the main part or stages in correct door operation, whether under manual or mechanical control or a combination of the two.

- (1) On the opening swing, the door closers function is to let the door open easily, except at the end of the swing where backcheck is applied.
- (2) Backcheck is a feature that cushions the opening swing to prevent the door from slamming into the stop. Special closers designed for potentially abusive applications begin the backcheck function much earlier (2A) such as LCN's advanced variable backcheck (AVB).
- (3) Through the long closing arc, a uniform, reasonable (main) speed should be maintained.
- (4) The latching arc allows the door to close quietly and firmly.

#### Opening the door builds up the power, which later closes the door.

As a controlled door is opened, the spring of the closer is compressed which builds up the power to close the door. Normally, more opening force would be required as spring compression increases. However, as an LCN closer changes it's arm geometry while the door opens, it increases the door leverage. This offsets the spring compression, resulting in greater ease in opening the door.

#### In opening, more leverage for the person.

The changing arm geometry gives increased leverage over the door to overcome the growing power of the spring allowing one to pass through the door easily.

#### In closing, more leverage for the closer.

When the person releases the door and the closer takes over, spring power is applied through the arm system to close the door. Because the spring has been compressed, its power is very high. As the door closes the spring expands, providing the power to close the door.

### Special closers for reduced opening force.

The 1990 Americans with Disabilities Act (ADA) and ANSI Standard A117.1 describe maximum opening force limitations for certain non-fire rated doors. The last page of each closer section in the catalog includes a section titled REDUCED OPENING FORCE CLOSERS. This section lists closers in that specific series that will comply with a maximum opening force based on the width of the door.

Any manual door closer, including those certified by BHMA to conform to ANSI Standard A156.4, that is selected, installed, and adjusted based on ADA or other reduced opening force requirements may not provide sufficient power to reliably close and latch the door.

Refer to AUTOMATIC OPERATORS section for information on electric, pneumatic and electromechanical systems that meet reduced opening force requirements without affecting closer power.

### **HOW TO SELECT A DOOR CLOSER**

#### **CONCEALED OR SURFACE MOUNTED CLOSERS?**

Door closers are available in two styles - concealed or surface mounted. In choosing a closer style for a particular application, consideration should be given to the type of door being controlled, frame conditions, aesthetic requirements, and control features needed. Information contained in the following material can serve as a guide in selecting the style and model of closer to meet specific requirements.

#### IF CONCEALED, WHERE?

Closers concealed in the head frame over the door are out of sight and entirely out of the pedestrians way. They cannot be harmed by scrub water, cleaning chemicals or floor dirt, and are protected from airborne contaminants, like dust. They are easy to reach for regulation without removing any parts. Closers for frame sections as thin as 1-3/4" (44 mm) are available.

Closers located within the door itself are also hidden and protected but recommended for interior doors only.

#### SURFACE MOUNTED CLOSERS - LOCATION?

Closer location is subject to the considerations of practicality and appearance. Good taste usually decrees that closers on doors along a corridor be located on the room side of the door so they are out of the line of sight from the corridor. Closers should be placed on the inside of exterior doors for appearance and to shelter them from the elements.

#### WHERE ARE HEAVY DUTY CLOSERS REQUIRED?

Heavy duty closers should always be used in these places:

- 1) Schools or public buildings where heavy or abusive usage is expected.
- 2) Exterior doors.
- 3) Doors subject to draft, winds, or air pressure differentials.
- 4) High frequency doors such as those on department stores, malls, or mixed use tenancies.

#### WHICH ARM SYSTEM?

**Double lever** arm closers can provide control under difficult conditions for either interior or exterior doors. A parallel arm system is a type of double lever arm where the main arm is parallel to the face of the closed door. Available double lever arms:

**Single lever** arm (track) closers may be used on interior or sheltered exterior doors. The hold-open function in a single lever arm system is provided by either the track or the cylinder assembly. Available single lever arms:

#### DO YOU NEED SPECIAL CYLINDER FUNCTIONS?

Many LCN closers can be ordered with a delayed action function built into the cylinder. **Delayed action** (DEL) is a special hydraulic circuit that provides additional time to pass through the door. A special regulating screw controls the closing speed from maximum opening through approximately 75°. After that point the normal main speed resumes control to close the door. Delayed action is not available with single lever arm (track) closers.

# **Advanced Variable Backcheck** (AVB) is available with high security and 4110 series closers to begin cushioning the opening swing at about 45° (2A) instead of the usual 75° (2). AVB is especially suited for potentially abusive applications.

**Multi-point** (ME series) closer/holders can be ordered with a hold-open bypass at either 80° or 140° function. This feature does not allow hold-open to take effect until opened beyond the selected degree of bypass.

### IS SEASONAL ADJUSTMENT REQUIRED?

Temperature changes can affect the operation of common door closers by changing the viscosity of the hydraulic fluid inside the closer. As temperature rises, the fluid thins out and closes the door more rapidly. As temperatures decrease, the fluid thickens causing the closer to close the door very slowly.

LCN uses all weather Ultra X fluid to eliminate the need for seasonal adjustment.

#### **HOW WILL THE DOORS BE HUNG?**

While butt hinges provide the most common method of hanging doors, some doors are hung on pivots centered in the door, others on offset pivots. Surface mounted closers will handle doors hung in any of these three

ways. LCN 4020 Series closers can even control a "balanced" door installation. Concealed closers may conflict in location with pivot leaves and thus may

require special templating.

#### HOW FAR SHOULD THE DOOR OPEN?

Three basic rules apply to maximum degree of opening.

- It is best to let the door swing as far as it can swing freely.
   Some closers are mounted in different locations for different degrees of opening.
- Use a mechanical stop when a door can not swing 180° or at the selected hold-open point of a double lever arm system.
   The mechanical stop can be mounted on the floor, wall, overhead, or built into the closer arm.
- The closer should be positioned so backcheck takes place well in advance of the stop position to cushion the opening swing and prevent door and frame damage from an abrupt stop.

Mechanica considerations

#### DOOR DIMENSIONS?

The width of the door is the main consideration in determining the correct closer size. Size here refers to the minimum spring power and hence the closing force, generated by the closer. In the catalog, the interior and exterior TABLE OF SIZES for each closer are set up for ranges of door width and assume normal operating conditions. If a door is of exceptional height, weight, special construction, or if drafts and air pressure differentials exist, increased closer power should be considered.

Door thickness may be a factor. A concealed-in-the-door closer should not be used in a hollow metal door less than 1-1/2" (38 mm) thick or a wood door under 1-3/4" (44 mm). Exceptionally thick doors can affect hinge and pivot centers to the extent that closer functions and geometry are also affected.

The depth of the doors top rail is important to nearly every closer installation. Narrow top rails may require plates to successfully mount the closer. An insufficient top rail in flush, hollow, or composite filled doors may make concealed-in-the-door installations impractical.

#### HAND OF A DOOR?

Some door closers are handed. When approaching a door from the push side, if hinged on the left, it is a left hand door; if hinged on the right, it is a right hand door.

For purposes of handing door closers, right hand reverse bevel and left hand are identical. Also, left hand reverse bevel and right hand are identical.

# WILL A STANDARD CLOSER AND TEMPLATE MEET YOUR NEEDS?

Occasionally the physical limitations of the selected closer may not provide the desired functions or degree of opening. Standard templated locations may interfere with other applied hardware. In these situations, contact the LCN Applications Engineering Department for assistance. Customized installation templates or products may be available to solve an unusual application.

# WHY USE PLATES, BRACKETS, ADAPTERS AND OTHER SPECIAL PIECES?

A drop plate is now commonly used to drop (lower) closers to meet special conditions or adapt a closer to door or frame surfaces that are not adequate for normal mounting patterns.

Specialized brackets, adapters, and parallel arm shoes are available to simplify the installation of closers with a variety of frame and door conditions. The most commonly used are listed with each closer. Consult LCN for assistance if you are not sure.

#### WHAT FASTENERS SHOULD BE USED?

LCN closers are shipped with a wood and machine screw pack or Self-Reaming and Tapping screws (SRT) unless other fasteners are ordered. These screw packs are suitable for wood or properly reinforced hollow metal frames and metal or solid core wood doors. For wood door applications, LCN recommends the use of wood screws. For selected closers, metric machine screws are available in lieu of UNC/UNF machine screws.

When attaching closers to hollow core doors, optional THRU BOLTS (TB) are recommended to minimize crushing or squeezing the door. Thru bolting can also provide a very strong mechanical connection for potentially abusive applications. Because the TB barrel extends completely through the door, the door thickness must be specified when ordering if it is other than 1-3/4" (44 mm). TB's are only available for 1/4-20 machine screws.

For high security applications, TORX machine screws are available with most closers. These are standard for all exposed fasteners with high security closers. TORX fasteners feature a hex lobular drive with a security pin in the center. They can only be installed or removed with a special set of bits that are available from LCN.

#### WHAT FINISH IS DESIRED?

LCN powder coating provides superior protection against the effects of weather conditions and is an environmentally friendly process. The high quality, chip resistant finish is far superior to any previously offered. Corrosion resistance surpasses 100 hours salt spray testing (four times the industry standard). Non-metallic components also provide the same high resistance to the effects of the elements. All LCN products must be shipped with a finish.

LCN offers custom finishing services to complement special installations. This provides a custom appearance and all the corrosion resistance inherent in the standard powder coated finishes. It is recommended that the customer submit a physical sample of desired custom finish with the closer order. Custom powder coat finishes are available at additional cost. A metal cover must be ordered when custom powder coat finishes are desired.

With some exceptions, visible components such as covers, arms, fasteners, and finish plates are available in plated finishes. Tracks are painted to complement the plated finish. Hidden assemblies such as cylinders and mounting plates are supplied with a powder coated finish. Plated finishes are available at additional cost.

For installations where a higher level of protection against weathering is required, LCN offers a special rust inhibiting (SRI) process at an additional cost. Metal components receive an SRI pretreatment and a standard or custom powder coat finish. The SRI process with a powder coat finish exceeds the protection level available with powder coated parts. SRI can not be ordered with plated or anodized finishes. All closers must be shipped with a finish.

#### INSTALLATION PROCESS?

Before installation of the door closer:

- Review the installation instructions provided with the door closer.
- Verify the desired installation and template with the hardware schedule. Review other applied door hardware for possible interference.
- Verify that the frame attachments and door hinges or pivots are securely installed.
- Verify that the door is hung properly and operates smoothly through it's entire range of opening. Misalignment, sagging or other conditions that prevent free movement of the door must be corrected prior to installation of the door closer. LCN recommends < 1/4 lbf to open the door before installing closers for ADA applications.
- Check latching mechanisms for proper operation and release.
- Verify that the door and frame have specified reinforcements.
- Verify that all required tools are available.

#### Complete the installation by:

- Follow the installation instructions and use fasteners provided with the closer.
- Using the template provided with the closer, layout, drill and tap (for metal screws) the required mounting holes. Be sure to use the proper size drill bit and tap to ensure maximum holding power by the screws.
- For closers with adjustable spring power, adjust the cylinder spring power based on the width of the door as described in the installation instructions.
- The hydraulic back check, main speed and latch speed regulation adjustments of the door closer have been adjusted at the factory to meet normal installation conditions. If further adjustments are required to the hydraulic regulation, follow the directions included with the installation instructions.
- Lightly wipe the cover and arm surfaces with a soft, clean, dry cloth to remove any dirt or smudges that occurred during the installation.

**A21** 

Glossary of abbreviations

### **Arm Options**

STD - Standard Arm REG - Regular Arm

Rw/PA - Regular Arm with Parallel Arm Shoe R/62A - Regular Arm with Auxiliary Parallel

Arm Shoe

H - Hold Open Arm

Hw/PA - Hold Open Arm with Parallel Arm Shoe

LONG - Long Arm

FRAME DEPTH FRAME FRAME FACE FACE RABBET RABBET STOP HEIGHT HINGE Pull **Push** SIDE FRAME STOP TOP RAIL OF DOOR side side REVEAL SOFFIT HINGE REVEAL PANEL OR DOOR THICKNESS

# ADA – Americans with Disabilities Act.

**ADVANCED VARIABLE BACKCHECK CYLINDER (AVB)** – Optional cylinder that starts backcheck at about 45° (2A) instead of the normal 75°(2).

**ANODIZED** – An electrochemical process that thickens and toughens the protective oxide on aluminum metal.

**ANSI** – American National Standards Institute publishes standards for commercial hardware. A156.4 is the basic door closer standard.

**APPLIED STOP** – Surface mounted stop attached to a cased opening frame.

**ARCH TOP DOOR** – Any door with an arched top rail.

**ARMATURE EXTENSION** – Standard metal extensions available for SEM magnets where the armature does not reach the magnet. Available in 1/2", 3/4", 1", 2", 4" or a kit including all sizes.

**AUTOEQUALIZER™** – An LCN specific term for an electric or a pneumatic power operator. System is low-energy & carries a two-year warranty.

**AUTOMATIC OPERATOR** – A term used to describe a type of automated opening system.

**AUXILIARY DOOR STOP** – Hardware designed and installed to limit the swing of a door.

#### В

**BACKCHECK** – Hydraulic circuit designed to cushion the doors opening swing at about 75°. Standard on all LCN closers.

**BACKCHECK SELECTOR VALVE** – Valve used to provide proper backcheck location for 4040XP and 4050 parallel arm mounting.

**BLADE STOP** – Narrow frame stop that will not accept a parallel arm shoe.

**BLADE STOP SPACER** – Spacer lowers a parallel arm 1/2″ so the arm will clear a blade stop.

**BLOW-OPEN** – A type of control box that is used for a smoke evacuation system. Can be used with or without a normal power operator system.

**BRIGHT METALLIC** – Custom powder coat finish, which resembles that of US26 or US26D plated finish.

**BYPASS CYLINDER** – ME cylinder that will not hold-open within a specified range of door swing.

C

**CASED OPENING** – Frame section without stops.

**CAST ALUMINUM** – Material used in producing LCN's competitively priced door closers.

**CAST IRON** – Material used in producing high quality door closers.

**CLEARANCE** – Distance from a PA SHOE to the push side of door or distance from the pull side of door to the wall on  $90^{\circ}$  installations.

**CLOSING FORCE** – Energy generated by a closer to close and latch the door.

**CONTROL BOX, Standard, 9100 SERIES** – Microprocessor door control without Power Boost or built in power supply.

**CONTROL BOX, 2800, 9500 SERIES** – Microprocessor door control, includes adjustment for opening, closing & backcheck speeds. Features Push 'N Go & Power Boost.

**CONTROL BOX, 7900 SERIES** – Heavy duty, surface mounted control box that contains one or two electrically controlled pneumatic circuits.

**CONTROLLER ASSEMBLY** – Digital control suite used in the LCN electric power operator. Includes adjustments for opening force and opening speed.

**CONCEALED IN DOOR** – Closer with cylinder concealed in the top rail of the door with either an exposed or concealed arm.

**CUSH SHOE SUPPORT** – Support provides fifth screw anchorage of CUSH shoes on frames with narrow push side reveals.

**CUSH-N-STOP ARMS (CUSH)** – Extra duty, parallel arm that includes a stop in the CUSH shoe.

**CUSTOM POWDER COAT (RAL)** – An optional powder coat finish. Currently, LCN offers a wide selection for special powder coat finishes. LCN uses a European color standard, referred to as an RAL #, to differentiate between finishes.

**CUTOUT** – Preparation of the top rail of a door or frame for concealment of the closer, arm or track.

**CYLINDER ASSEMBLY** – Main closer component complete with any mounting plates or electronics.

**CYLINDER ONLY** – Hydraulic cast iron cylinder.

#### D

**DEEP REVEAL** – Reveal deeper than what an arm will accommodate.

**DELAYED ACTION (DEL)** – Delays closing from maximum opening to approximately 75°.

**DESIGNER SERIES COVER (DS1)** – An aesthetically pleasing cover design that appeals to many types of facilities & architects.

**DOOR POSITION SWITCH (DPS)** – A security option specific to the 2210 Series closer. A door position switch is used to monitor the closed position of a door in an opening.

**DOUBLE DOOR HEADER** – One automatic electromechanical power operator and one manual door within the same header, for a pair of doors.

**DOUBLE ACTING** – Term used to describe door swing. A double acting frame does not have a stop thus allowing the door to swing 95° in both directions.

**DOUBLE EGRESS ARM (DE)** – Designed for pull side installation on double egress frames. Actual arm varies depending on selected closer.

**DOUBLE LEVER ARM** – Two-part arm hinged at the elbow that provides superior leverage. Used on hinge side, top jamb and parallel arm mountings, the geometry of the arm provides greater mechanical advantage to the closer.

**DOUBLE RABBET FRAME** – Frame with a recess or offset formed on both sides of a stop to receive a door.

**DROP PLATE** – Designed to mount a closer on top rail or head frame to meet special conditions or mounting surface dimensions that are below minimums.

#### E

**ELECTRIC STRIKE** – An optional, electronic latching device that replaces a regular lock strike in a doorframe that allows the door to open from a remote location or by special access equipment.

**ELECTRIC STRIKE RELAY (ES)** – An optional feature found in an LCN 7900 Series control box that can be used to control an electric strike.

**ELECTROHYDRAULIC POWER OPERATOR** – Power operator with an electrically controlled opening feature and hydraulic closing feature.

**ELECTROMECHANICAL POWER OPERATOR** – Power operator with an electrically controlled opening feature and closing feature.

**ESCUTCHEON** – An optional, protective or decorative plate that can be installed with many surface mounted actuators.

Glossary of terms

E-H

**EXTRA DUTY ARM (EDA)** – Double lever arm with both main and forearm made of solid forged steel for extra strength.

**EXTRA LONG ARM (XLONG)** – 4040XP Series double lever arm for exceptionally deep reveals or other special applications.

#### F

**(LCN®) FAST™ POWER ADJUST** – A green dial located on the end of the spring tube on selected heavy duty closers. Designed to help installers accurately adjust the closer power to match the conditions of the entrance.

**FIFTH SCREW** – Mounting screw farthest from the door on a parallel arm shoe.

**FIFTH SCREW SPACER** – Supports PA shoe mounted on frame stop.

**FINISH PLATE** – Decorative plate applied to overhead concealed closer to conceal closer mounting plate and screws.

**FIRE SHIELD** – 22-gage steel liner mounts in the track mortise of the door's top rail for 20 minute labeled wood doors.

**FLUSH CEILING** – Condition when the ceiling is at the same height as the top of the frame.

**FLUSH PANEL ADAPTER** – Adapter provides PA shoe mounting surface when door and frame are flush.

**FOREARM** – Arm part that connects main arm to the shoe attachments in a double lever arm system.

**FRAME DEPTH** – Face to face dimension of the frame.

**FRAME FACE** – Exposed part of frame parallel to face of the wall.

**FULL COMPLIMENT BEARINGS** – Low friction, high load needle bearings found in all LCN closers.

**FULL COVER (FC)** – Cover that encloses cylinder assembly except for shaft/arm attachment.

**FUSIBLE LINK ARM (FL)** – Releases hold-open function when exposed to high temperatures. 135°F and 165°F available.

**HAND** – Direction of a doors' swing, either right or left.

**HANDED** – Closer or part designed for ONLY right or left swinging doors.

**HEAD FRAME** – Member of the frame above the door.

**HEADER** – Aluminum enclosure for motor gearbox & controller.

**HINGE SIDE** – Face of door and frame on which the hinge pivot point is located.

**HINGE SIDE MOUNT** – Mounting with the closer cylinder on the hinge side of the door top rail.

**HINGE SIDE REVEAL** – Depth measured from the frame face to the pull side of the door face.

**HINGE STILE** – Vertical member of a door prepared for installation of hinges.

**HOLD-OPEN ARM (H)** – Double lever arm that provides holdopen function that is either adjustable at elbow or shoe.

**HOLD-OPEN CLIP** – Located in track to provide hold-open function for single lever arms.

**HOLD-OPEN CUSH (HCUSH)** – Parallel arm that features solid forged steel main arm and forearm with stop in soffit shoe. Uses control handle to select hold-open function.

**HOLD-OPEN LONG ARM (HLONG)** – Hold-open arm extended by a long head and tube for deep reveals.

**HOLD-OPEN TRACK with BUMPER (HBUMPER)** – Track with hold-open clip and bumper assembly installed.

**HOLDER SCANNER-ACTIVATED (HSA)** – Electrically controlled closer/holder with built-in scanner.

**HYDRAULIC FLUID** – Fluid metered by valve system to control door.

ı

**INDEPENDENT PAIR** – Two automatic doors that function separately.

#### J

**JAMB** – The vertical member that forms the sides of a door frame. There is a hinge side jamb and a strike side jamb.

#### L

**LABELED DOOR** – Conforms to all applicable codes, requirements, and procedures governing fire rated doors and bears the manufacturer's identification label.

**LATCH SPEED** – Separate adjustment to control the last few degrees of the door's closing swing.

**LOCK STILE** – Vertical member of a door prepared for installation of a lock.

**LONG ARM (LONG)** – Extended arm for deep reveals or other special applications.

**LOW ENERGY OPERATOR** – A type of automated opener used on a door that should take approximately 5 seconds to open to 90°. Low Energy operators do not require safety devices or guide rails. Conforms to ANSI A156.19.

#### М

**MAIN ARM** – Connects to the cylinder in a double lever arm system.

**MAIN SPEED** – Separate adjustment to control closing swing of the door to within a few degrees of latch.

MAXIMUM OPENING – Furthest degree of door opening.

**METAL COVER (MC)** – Stamped metal cover required for optional plated finishes and custom powder coat finishes. Standard cover with High Security Series closers.

**MOTOR CLUTCH** – The geared assembly in an LCN electric power operator. Once activated, the motor clutch drives the door open.

**MOTOR GEARBOX** – Electromechanical drive unit.

M-P

**MORTISE** – Material removed from frame and/or top rail of door.

**MOUNTING/FINISH PLATE** – Plate with exposed mounting screws and finish applied.

MULTI-POINT HOLD-OPEN (ME) - Infinite hold-open points from 0° up to maximum opening.

#### N

**NO DESTRUCT FEATURE** – A feature specific to the motor clutch assembly portion of an LCN electric power operator. This feature does not allow the user to back drive the motor, which could cause damage to the unit.

**NON-HANDE**D – Closer or part designed for both right and left hand swinging doors.

**NON-SIZED** – Cylinder assembly with spring power adjustable over a range of sizes.

#### 0

**OPENING FORCE** – Force required to open the door against the closers spring power.

**OVERHEAD CONCEALED** – Closer with cylinder concealed in head frame and either a concealed or exposed arm.

**PA SHOE ADAPTER** – Adapter provides horizontal mounting for PA shoe on a flush door and frame.

**PA SHOE** – Attaches the forearm to the soffit for a parallel arm system.

**PACKING NUT** – A threaded part that holds the pinion in place. Usually, the LCN model number and date of manufacture are stamped into this part. The date of manufacture is important because the owner can determine if the cylinder is in or out of warranty.

**PANIC BREAKAWAY STOP** – An optional safety device that permits egress on in-swinging exterior doors by allowing them to swing out in case of an emergency. Used with overhead concealed, center pivoted in-swinging doors.

**PARALLEL ARM** – A push side mounted double lever arm system where main arm is parallel to the door when in the closed position.

**PARALLEL ARM HOLDER (PAH)** – An item usually used on the inactive leaf of a pair of doors for hold-open where the active leaf has a closer installed.

**PINION** – Transfers rotary motion of the arm system to the piston. Also provides attachment of arms to closer.

**PISTON** – One of the internal pieces of a door closer. The piston is moved by the rotating pinion, which in turn compresses the spring.

**POSITIVE MECHANICAL STOP** – Door stop for overhead concealed, center pivoted out swinging doors.

**PNEUMATIC** – This type of LCN Automatic Operator is driven by an air source. The air source can be built into the control box or provided separately within the building.

**POWER BOOST** – Provides additional closing force to ensure latching.

**POWER OPERATOR** – A term used to describe a type of automated opening system. Refer to "Automatic Operators".

**POWDER COAT** – A standard finishing process that provides a very durable, corrosion resistant covering to the majority of products that LCN offers. An LCN powder coat finish offers over four times the ANSI salt spray test of 25 hours.

**PULL SIDE** – Hinge side of door.

**PUSH SIDE** – Face of door on stop side of frame.

**PUSH 'N GO** – Provides power opening after partial (5°) manual opening of door.

Q QUICK FIX PLATE™ – Retrofit mounting plate for the LCN 1260 closer used for closer replacement in push/pull applications.

#### R

**RABBET** – Recess or offset formed in the face to receive a door.

**RADIO FREQUENCY (RF)** – A method of actuating LCN Automatic Operators. A RF transmitter signals a RF receiver to open a door.

**REGULAR ARM** – A double lever, non hold-open arm.

**REGULATING SCREW** – Valve that adjusts flow of hydraulic fluid within cylinder to control door closing speed.

**REVEAL** – Depth measured from the frame face to the door face.

**ROD & SHOE** – Part of forearm that provides adjustable length feature for double lever arms.

**SELF-REAMING and TAPPING SCREW (SRT)** – Philips head screw with self-reaming and self-tapping capability used in mounting installations.

S

**SECOND CHANCE FEATURE** – A feature that allows the Automatic Operator two attempts at opening the door. If resistance is encountered on the first attempt, the operator will pause and then try a second time. This feature is standard on the LCN electric automatic operators.

**SEM** – SEM is short for 'single-point electronic magnet'. An actual product number is required when ordering.

**SENTRONIC** – A general term for the fire/life safety products that are offered by LCN.

**SEQUENCE** – An option to the LCN series of automatic operators. This option allows a pair of vestibule doors to open one after the other.

**SHOE** – Attaches forearm to frame or door face in a double lever arm system.

**SIMULTANEOUS PAIR** – Two automatic doors that open at the same time.

**SINGLE POINT HOLD-OPEN (SE)** – Electrically controlled hold-open using a special track and single lever arm.

**SINGLE LEVER (STANDARD) ARM (STD)** – Directly connects cylinder and track/roller assembly on the door or frame.

**SINGLE RABBET FRAME** – Frame with a recess or offset formed on one side of a stop to receive a door.

**SIZED** – A closer with a specific closer power for proper door applications.

**SLIDER** – This part is used in conjunction with a track roller in a Sentronic track assembly.

S-T

**SLIM LINE COVER** – A over that conceals the cylinder but exposes both pinion shafts.

**SOFFIT** – Horizontal surface of a frame between vertical stops on a double rabbet frame.

**SOFFIT SHOE** – Connects parallel arm shoe to soffit.

**SPECIAL RUST INHIBITOR (SRI)** – A special corrosion resistant pre-treatment that is available for most LCN closers. Adding SRI to the standard LCN powder coat finish gives the closer a tremendous advantage over a potentially corrosive environment.

**SPECIAL TEMPLATE (ST)** – A special template is usually a modification to a standard product. Either the product itself changes location in the opening or a component is modified from the standard offering to accommodate other hardware or door and frame dimensions.

**SPRING CUSH ARM (SCUSH)** – Non-handed parallel arm for abusive applications. Features solid forged steel main arm and forearm with spring loaded stop in the soffit shoe.

SPRING HOLD-OPEN CUSH ARM (SHCUSH) - Non-handed parallel arm for abusive applications features solid forged steel main arm and forearm with spring loaded stop in the soffit shoe. Uses control handle to select hold-open function.

**SPRING POWER** – Closing force exerted by the spring inside the cylinder to close the door.

**SPRING POWER ADJUSTMENT** – Mechanical pre-loading of spring to adjust closing force.

**SPRING TUBE** – Part of the closer assembly that contains the spring.

**STANDARD CYLINDER** – Cylinder with main speed, latch speed, and backcheck adjustments.

**STANDARD TRACK** – Non hold-open track.

**STOP** – Part of frame against which the door closes.

**STOP HEIGHT** – Distance the stop extends below the frame face.

**SWING FREE ARM** – ME arm designed to allow free movement of the door without disengaging the holding mechanism.

**TBSRT** – Thru bolts and self-reaming and tapping screw package.

**TBTRX** – Thru bolts and TORX security machine screw package.

**TBWMS** – Thru bolt, wood and machine screw package.

**THICK HUB SHOE** – Substituted for soffit shoe on EDA arm to clear blade stop.

**TOP JAMB** – Mounting with closer installed on frame face.

**TOP RAIL** – Horizontal top member of a door that connects the latch and hinge stiles. Height is measured from stop on push side.

Glossary of terms

T-W

**TORX** – Security machine screw with TORX drive and security pin for tamper resistant applications.

**TRACK BUMPER** – Mounts in track to cushion opening swing, but reduces maximum opening. This is not a substitute for a mechanical door stop.

**TRANSFORMER** – Electrical device to reduce voltage from 120V AC to 24V AC.

**TRI-VOLTAGE** – SEM magnets available with current inputs of 12v, 24v and 120v.

#### U

**ULTRA LIQUID X** – All weather fluid that does not change viscosity over a wide temperature range.

**UNIVERSAL** – A term used to describe a door closer. Closers of this nature are non-sized and non-handed.

#### V

**VESTIBULE** – A small lobby or entrance that has at least two doors. One door is to the exterior and the other to the interior of the building. A variation could be multiple doors or banks of doors.

#### W

**WMS** – Standard wood and machine screw package.

**WOOD MOUNTING CLIP** – Designed to ease installation of concealed closer in wood frame.

### Product selection guide

Surface mounted 4000 Series LCN closers feature a modern design engineered for each application, easy installation, and superior performance. This guide is based on the desired mounting of the closer.

<sup>\*</sup> INDICATES HIGH SECURITY CLOSER. REFER TO THAT SECTION OF THE CATALOG.

### Product comparison

This chart shows a basic comparison of 4000 Series closers. Refer to the specific closer chapter for complete details.

AVAILABLENOT AVAILABLE

- & Closer available with less than 5.0 lbs. opening force on 36 " door.
- \* Maximum opening/hold-open point with standard template. See individual closer series for degrees of opening per installation.
- \*\* Advanced Variable Backcheck.
- \*\*\* Delay Action for 4040XP incorporates standard 4041 cylinder.

**B1** 

### 4000 Series surface mounted closers

#### **APPLICATIONS**

- For aluminum, hollow metal, or wood swinging doors and frames.
- Can be used with hinge or pivot mounted door.
- Adapter plates and other installation accessories available for unusual conditions.

#### **FEATURES COMMON TO 4000 SERIES**

- Each closer (except 4050, 4050T, 4040XP, 4040XPT, 4030, 4030T) is designed for a specific mounting; hinge side, top jamb, or parallel arm. 4040XP closer with regular or hold-open arm mounts hinge side or top jamb. 4030, 4040XP and 4050 regular parallel arm closers include 62PA SHOE required to parallel arm mount either regular or hold-open arm.
- Handed for right or left swinging doors, except for 4000T, 4030. 4030T, 4040XP, 4050, 4050T and 4040XPT.
- Closers to meet ADA reduced opening force requirements except 4000T.
- Adjustable hydraulic backcheck cushions opening swing prior to 90°.
- Separate regulation of general closing speed and latching speed.
- Joints in regular arm and shoe adapt to uneven trim.
- Reversible shoe to boost latching power on double lever arms.
- Available in a wide range of standard or optional custom powder coat finishes to blend with door and frame.
- Plated finishes available to accent door and frame.
- Not designed for exterior mounting or exposed to elements.

#### **DESIGN ASSISTANCE**

LCN has been providing reliable solutions to unique door control problems since 1925. Design and specification assistance are only a phone call away.

Contact LCN for assistance or technical information at 877-671-7011 or FAX 800-248-1460 (Order Entry), Fax 815-879-1495 for Product Support.

#### WARRANTY

30 year limited warranty; 25 year limited warranty (4050). See General Information Section for complete warranty details.

#### **SPECIFICATIONS**

Refer to "SPECIFICATIONS" section for suggested architectural specifications.

#### **MATERIALS**

- High strength **cast iron** or **cast aluminum** (4050) cylinder.
- Forged steel main arms.
- One piece forged steel piston.
- **Double heat treated** pinion.
- LCN's **all weather "Liquid X" fluid** performs to temperature ranges from 120°F (49°C) to -30°F (-35°C) without any seasonal adjustment.
- High efficiency, full complement, low friction bearings.
- Tamper resistant regulating screws.
- Full rack and pinion hydraulic action.
- Ouiet, low friction track and roller combination for all single lever arm (track style) closers.

#### **FINISHES**

- Available in six standard or optional custom powder coat finishes to blend with door and frame.
- LCN's powder coat finishes surpass 100 hours of salt spray which is over four times the ANSI standard for corrosion resistance.
- For installations where a higher level of corrosive resistance is required, LCN offers an optional special rust inhibiting (SRI) pretreatment. Closers that combine the exclusive LCN powder coat finish and the SRI pre-treatment exceed the ANSI standard for corrosion resistance even further.
- Plated finishes are available as an option to accent door and frame. (SRI not available with plated finishes).

#### **LISTINGS & APPROVALS**

UL listed for self-closing doors without hold-open under "SWINGING DOOR CLOSERS" (GVEV) file R1943.

Tested and certified under ANSI Standard A156.4 Grade One. Consult factory for details.

Consult factory for other listings such as; cUL, California State Fire Marshal, Bureau of Standards and Appeals.

#### **POSITIVE PRESSURE**

LCN closers have been certified for three hours by UL to be in compliance with UL 10C. Contact LCN for specific details on door closer fire ratings.

#### **FASTENERS**

4010, 4010T, 4020, 4020T, 4040XP, 4040XPT, 4050, 4050T, 4110, 4110T Series closers are shipped with: A standard SELF-REAMING and TAPPING SCREW (SRT) pack that contains Philips head SRT screws to install the closer. 4000T series closers are shipped with: A standard WOOD and MACHINE SCREW (WMS) pack that contains Philips head wood and machine screws to install the closer, 4030, 4030T series closers are shipped with: A standard WOOD and SELF-TAPPING MACHINE SCREW (WMS) pack that contains Phillips head wood and self-tapping machine screws to install the closer. Standard LCN thru bolts (TB) can be installed on 1-3/4" (44 mm) thick doors with 1/4-20 machine screws. Optional thru bolt (TB) sizes are available for 1-5/8" (41 mm) or 1-3/8" (35 mm) door thickness, but this must be specified when ordering.

#### Notes:

1. For Thru Bolts, specify door thickness if other than 1-3/4" (44mm), represented in diagram as dimension "X".

- 2. Phillips head, metric machine screws are available, please specify.
- 3. LCN recommends the use of wood screws, available in optional WMS screw packs, for wood door applications.

#### **MAINTENANCE**

Closers mounted according to LCN installation instructions require no periodic maintenance or adjustments.

# The 4010 is LCN's best performing heavy duty closer designed specifically for institutional and other rugged high traffic applications.

### 4010 Series

### Mounting details

Hinge (Pull) Side Mounting

Butt Hinges	Should not exceed 5" (127 mm) in width
Auxiliary Stop	Recommended at hold-open point or where a door cannot swing 140°
Reveal	Should not exceed 3/4" (19 mm). Should not exceed 1/8" (3 mm) for Fusible link arm
Top Rail	<ul> <li>Less than 3-3/4" (95 mm) requires PLATE, 4010-18</li> <li>Plate requires 2" (51 mm) minimum</li> <li>Clearance of 2-1/4" (57 mm) behind door required for 90° installation</li> </ul>
Delayed Action	<ul> <li>Add suffix "DEL" to selected cylinder</li> <li>Not available with 4016 cylinder</li> <li>Delays closing from maximum opening to approximately 70°.</li> <li>Delay time adjustable up to approximately 1 minute</li> </ul>
Maximum Opening	Can be templated for:
	100°: A = 5-15/16″ (151 mm) 140°: A = 4-3/16″ (106 mm) B = 11-15/16″ (303 mm) B = 10-3/16″ (259 mm)
	Hold-open points up to maximum opening with hold-open arm
Arm Clearance	Regular arm:  C = 1-1/16" (27 mm)  Hold-open arm:  C = 1-3/8" (35 mm)  Fusible link arm requires:  C = 1-5/8" (41 mm)

#### Note:

<sup>·</sup> Hold-open points up to maximum opening with hold-open arm

### Mounting details

Hinge (Pull) Side Mounting

Butt Hinges	Should not exceed 5" (127 mm) in width		
Auxiliary Stop	Recommended at hold-open point or where a door cannot swing 180°		
	Note: Optional track bumper assembly assists backcheck in cushioning the opening swing of the door. It is not intended to replace an auxiliary stop		
Reveal	<ul> <li>Should not exceed 1/8" (3 mm) for standard arm</li> <li>Should not exceed 3-5/16" (84 mm) for double egress arm</li> </ul>		
Top Rail	<ul><li>Less than 3-3/4" (95 mm) requires PLATE, 4010T-18</li></ul>		
	Note: Plate requires 2" (51 mm) minimum		
Head Frame	Requires 1-1/2" (38 mm) minimum		
Clearance	■ 2-1/4" (57 mm) behind door required for 90° or 180° installation		
Maximum Opening	<ul> <li>Templating allows 180° with standard arm, limited to 120° when optional bumper is installed</li> <li>Consult factory if door will be held open at 180°</li> <li>Variable hold-open angles with infinite options</li> </ul>		

#### Notes

- Many track style door closers are capable of allowing 180° of door swing
- The majority of track style closers are at their weakest closing force in the 180 130° range
- · Consult factory for applications where door must swing 180°

### **Cylinders**

- \* Maximum opening/hold-open point with standard template. See individual closer series for degrees of opening per installation.
- \*\* Advanced Variable Backcheck

## Mounting details

Hinge (Pull) Side Mounting

<b>Butt Hinges</b>	Should not exceed 5" (127 mm) in width	
Auxiliary Stop	Recommended at hold-open point or where a door cannot swing 180°	
Reveal	Should not exceed 3/16" (5 mm) for regular arm or 3/16" (5 mm) for hold-open arm	
Top Rail	Requires 2-7/8" (73 mm) minimum	
Clearance	1-3/4" (44 mm), behind door required for installation	
Maximum Opening	<ul> <li>Can be templated for 180°</li> <li>Hold-open points up to maximum opening with hold-open arm</li> </ul>	

Mounting details

Top Jamb (Push Side) Mounting

<b>Butt Hinges</b>	Should not exceed 5" (127 mm) in width	
Auxiliary Stop Recommended at hold-open point or where the door cannot swing 180°		
Reveal	<ul> <li>up to 3-1/2" (89 mm) allows 180° opening</li> <li>up to 7-1/2" (191 mm) with long arm allows for 140° opening</li> </ul>	
Top Rail	Requires 1-1/2" (38 mm) minimum from stop	
Head Frame	<ul> <li>Less than 2-1/4" (57 mm) requires PLATE, 4030-18TJ</li> <li>Plate requires 1-1/2" (38 mm) minimum</li> </ul>	
Maximum Opening  ■ Can be templated for 180° ■ Hold-open points up to maximum opening with hold-open arm		

### Mounting details

Parallel arm (Push Side) and EDA mounting

### Parallel arm mount

### **EDA** mount

Butt Hinges	Should not exceed 5" (127 mm) in width	
Auxiliary Stop	Recommended at hold-open point or where a door cannot swing maximum opening	
Clearance	<ul> <li>For 4030-62PA shoe is 4" (102 mm) from door face</li> <li>EDA arm is 5-1/2" (140 mm) from door face</li> </ul>	
Top Rail	<ul> <li>Less than 5" (127 mm) measured from the stop requires PLATE, 4030-18PA</li> <li>Plate requires 1-3/4" (44 mm) minimum</li> </ul>	
Stop Width	Minimum 1" (25 mm)	
Head Frame	Flush or single rabetted requires PA SHOE ADAPTER, 4030-419	
Blade Stop	Clearance, requires 1/2" (13 mm) BLADE STOP SPACER, 4030-61	
Auxiliary Shoe	<ul> <li>4030-62A allows installation of regular arm with overhead holder/stop</li> <li>Special templating required</li> </ul>	
EDA Arm	Requires SHOE SUPPORT, 4030-30 for fifth screw anchorage where reveal is less than 3-1/16" (78 mm)	
Maximum Opening	<ul> <li>REGULAR or HOLD-OPEN arms can be templated for 180°</li> <li>EDA template allows 110° maximum opening</li> <li>Hold-open points up to maximum opening with hold-open arm</li> </ul>	

### Notes:

- · 4030 closers ordered with EDA arms include 4030-201 FIFTH HOLE SPACER to support the shoe
- · REGULAR or HOLD-OPEN arm mounting requires PA SHOE, 4030-62PA for regular or HOLD-OPEN arms. Add prefix "P" to closer description (eg. P4031.)
- · P4031 closer includes 4030-201 FIFTH HOLE SPACER to support PA SHOE

### **CUSH mount**

Mounting details

CUSH and Spring CUSH Mounting

### **Spring CUSH mount**

Spring Cush dead stop points are approximately 5° greater than templated stop point.

Maximum opening	85°:	and SPRING COSH arms can be A = 3-5/8 (92 mm) B = 9-3/4" (248 mm)	90°:	or maximum opening/notd A = 3" (76 mm) B = 9-1/8" (232 mm)	<u> </u>	: A = 1-7/8" (48 mm) B = 8" (203 mm)
CUSH or Spring CUSH ARM	Requires SHOE SUPPORT, 4030-30 for fifth screw anchorage where reveal is less than 3-1/16" (78 mm)  CUSH and SPRING CUSH arms can be templated for maximum opening/hold-open point at:					
CUCH on Contract CUCH ADM	Describes CUDE CUDEDATE (020.20 for fifth executed above on these varieties there 2.186"/70 even					
Head Frame	Flush or rabetted requires CUSH FLUSH PANEL ADAPTER, 4030-419					
Clearance	For CUSH or SPRING CUSH shoe is 5-1/2" (140 mm) from door face					

<sup>\*</sup> $100^{\circ}$  mounting will not work with swing clear hinges.

### Note:

**B27** 

<sup>· 4031</sup> closers ordered with CUSH or SPRING CUSH arms include 4030-201 FIFTH HOLE SPACER to support the shoe

### **Cylinders**

#### 4031-3071 Cast Iron Cylinder Assembly

- Non-handed
- Standard

### Covers

### 4030-72MC

#### **Metal Cover**

- Non-handed
- Standard

### **Installation Accessories**

### 4030-18TJ Plate

- Required for top jamb mounting where head frame is less than 2-1/4" (57 mm) or flush ceiling condition exists
- Requires 1-1/2" (38 mm) minimum

### 4030-18PA Plate

- Required for parallel arm mounting where top rail is less than 5" (127 mm), measured from the stop
- Rrequires 1-3/4" (44 mm) minimum

### 4030-30 **CUSH Shoe Support**

 Provide anchorage for fifth screw used with CUSH arms where reveal is less than 3-1/16" (78 mm)

### 4030-61 **Blade Stop Spacer**

Lowers parallel arm shoe to clear 1/2" (13 mm) blade stop

### 4030-62A **Auxiliary Shoe**

- Requires a top rail of 7" (178 mm)
- Replaces -62PA for parallel arm mounting of regular arm with some overhead holder/stop
- Optional

#### 4030-419 PA Flush Panel Adapter

Provides horizontal mounting surface for PA or CUSH shoe on single rabetted or flush frame

### 4030-62PA

### PA Shoe

 Required for parallel arm mounting

Accessories

4030-3077 Regular Arm

- Non-handed
- Mounts hinge side or top jamb
- P4031 closer includes PA SHOE, 4030-62PA is required for parallel arm mounting

4030-3077LD **Light Duty Arm** 

- Non-handed
- Mounts hinge side, top jamb or parallel arm (62PA required)
- Optional

4030-3049L

Non-handed

Optional

Long Hold-Open Arm

with deep reveals

Includes LONG HEAD AND TUBE,

4030-3048L for top jamb mount

4030-3077L Long Arm

### Non-handed

- Includes LONG ROD AND SHOE, 4030-79LR for top jamb mount with deep reveals
- Optional

4030-3077EDA Extra Duty Arm

- Non-handed
- Extra duty arm features solid forged steel main and forearm for potentially abusive installations
- Optional

4030-3049EDA Hold-Open EDA Arm

- Handed
- Arm, provides hold-open function adjustable at shoe
- Optional

### 4030-3049 Hold-Open Arm

- Non-handed
- Mounts hinge side, top jamb or parallel arm (62PA required)
- Hold-open adjustable at shoe
- Optional

4030-3077CNS Cush-n-Stop® Arm

- Non-handed
- Solid forged steel main arm and forearm with stop in soffit shoe
- Optional

- Non-handed
- Provides hold-open function with templated stop/hold-open points
- Handle controls hold-open function
- Optional

# Spring CUSH Arm

- Non-handed
- For abusive applications
- Features solid forged steel main arm and forearm with spring loaded stop in the soffit shoe
- Optional

### 4030-3049SCNS Spring HCUSH Arm

- Non-handed
- For abusive applications
- Features solid forged steel main arm and forearm with spring loaded stop in the soffit shoe
- Handle controls hold-open function
- Optional

- Required for hinge side mount where top rail is less than 3-3/4" (95 mm)
- Requires minimum 2" (51 mm) minimum top rail

#### 4040XP-18G

### Plate

- Locates top jamb mounted closer flush with top of head frame face in flush ceiling condition
- Requires 1-3/4" (44 mm) minimum head frame

#### 4040XP-18TJ

#### Plate

Centers top jamb mounted closer vertically on head frame where face is less than 3-1/2" (89 mm). Plate requires 1-3/4" (44 mm) minimum head frame

#### 4040XP-18PA

#### Plate

- Required for parallel arm mounting where top rail is less than 5-1/2" (140 mm), measured from the stop
- Requires 2" (51 mm) minimum top rail

#### 4040XP-62PA PA Shoe

 Required for parallel arm mounting

**B42** 

# Arms

4040XP-3077 Regular Arm

- Non-handed
- Mounts pull side or top jamb with shallow reveal P4041 closer includes PA SHOE, 4040XP-62PA required for parallel arm mounting

4040XP-3049 Hold-Open Arm

- Non-handed
- Mounts pull side or top jamb with shallow reveal, hold-open adjustable shoe
- 4040XP closer includes 4040XP-62PA shoe required for parallel arm mounting
- Optional

4040XP-3077EDA/62G Extra Duty Arm with 62G

- Non-handed
- Features forged, solid steel main and forearm for potentially abusive installations
- 62G shoe provides additional blade stop clearance
- Optional

#### 4040XP-3077SCNS Spring CUSH Arm

- Non-handed
- For abusive applications features solid forged steel main arm and forearm with spring loaded stop in the soffit shoe
- Optional

#### 4040XP-3077L Long Arm

- Non-handed
- Includes LONG ROD AND SHOE, 4040XP-79LR for top jamb mount
- Optional

4040XP-3049L Long Hold-Open Arm

- Non-handed
- Includes LONG HEAD AND TUBE, 4040XP-3048L for top jamb mount

4040XP-3049EDA/62G

abusive installations

## 4040XP Series

#### Accessories

#### **Installation Accessories cont.**

#### 4040XP-30 CUSH Shoe Support

- Provides anchorage for fifth screw used with CUSH arms, where reveal is less than 3-1/16" (78 mm)
- Optional

4040XP-54 Snap-On Cover Clip

 Used to secure 4040XP-72 Plastic Cover to cylinder body

#### 4040XP-61 Blade Stop Spacer

- Required to lower parallel arm shoe to clear 1/2" (13 mm) blade stop
- Optional

#### 4040XP-419 PA Flush Panel Adapter

- Provides horizontal mounting surface for parallel arm shoe on single rabetted or flush frame
- Optional

#### 4040XP-62A Auxiliary Shoe

- Requires a top rail of 7" (178 mm)
- Shoe replaces -62PA for parallel arm mounting of regular arm with overhead holder/stop
- Optional

- Optional

#### **Alternate Cover**

#### 4050-72ALT Alternate Cover

- Non-handed
- Optional, sold separately (not packed with closer)

#### **Installation Accessories**

#### 4050-18 Plate

- Required for hinge side mount where top rail is less than 3-7/8" (98 mm)
- Requires minimum 1-3/4" (44 mm) top rail

#### 4050-18G Plate

## Locates top jamb mounted

- closer flush with top of head frame face in flush ceiling condition
- Contact LCN Product Support for minimum head frame requirement.

#### 4050-18PA Plate

- Required for parallel arm mounting where top rail is less than 5-3/4" (146 mm), measured from the stop
- Requires 2-1/4" (57 mm) minimum top rail

#### 4050-30 **Cush Shoe Support**

Provides anchorage for fifth screw used with CUSH arms, where reveal is less than 3-1/16" (78 mm)

#### 4050-61 Blade Stop Spacer

 Required to lower parallel arm shoe to clear 1/2" (13 mm) blade stop

4050-419 Flush Panel Adapter

 Provides horizontal mounting surface for parallel arm shoe on single rabetted or flush frame

#### 4050-62A **Auxiliary Shoe**

- Requires a top rail of 7-13/16" (198 mm)
- Replaces -62PA for parallel arm mounting of regular arm with overhead holder/stop
- Optional

#### 4050-62PA PA Shoe

Required for parallel arm

mounting

#### 4050-3077 Regular Arm

- Non-handed
- Mounts pull side or top jamb with shallow reveal
- Includes PA SHOE, 4050-62PA required for parallel arm mounting

4050-3077L Long Arm

- Non-handed
- Includes LONG ROD AND SHOE, 4050-79LR for top jamb mount
- Optional

4050-3049 Hold-Open Arm

- Non-handed
- Mounts pull side or top jamb with shallow reveal
- Hold-open adjustable shoe
- 4050 closer includes 4050-62PA shoe required for parallel arm mounting
- Optional

4050-3049L Long Hold-Open Arm

- Non-handed
- Hold-open adjustable shoe
- Includes LONG HEAD AND TUBE, 4050-3048L for top jamb mount
- Optional

4050-3077EDA Extra Duty Arm

- Non-handed
- Features forged, solid steel main and forearm for potentially abusive installations

4050-3049EDA

#### Hold-Open Extra Duty Arm

- Handed
- Features forged, solid steel main and forearm for potentially abusive installations
- Hold-open function is adjusted at the shoe

4050-3077EDA/62G Extra Duty Arm With 62G

- Non-handed
- Features forged, solid steel main and forearm for potentially abusive installations
- 62G shoe provides additional blade stop clearance for use with additional door hardware such as an overhead holder

4050-3049EDA/62G

#### Hold-Open Extra Duty Arm With 62G

- Features forged, solid steel main and forearm for potentially abusive installations
- 62G shoe provides additional blade stop clearance for use with additional door hardware such as an overhead holder
- Hold-open function is adjusted at the shoe

#### 4050-3077CNS Cush-N-Stop® Arm

- Non-handed
- Features solid forged steel main arm and forearm with stop in soffit shoe
- Optional

#### 4050-3049CNS

#### **HCUSH Arm**

- Provides hold-open function with templated stop/hold-open points
- Handle controls hold-open function

#### Accessories

## Arms cont.

#### 4050-3077SCNS Spring CUSH Arm

- Non-handed
- For abusive applications features solid forged steel main arm and forearm with spring loaded stop in the soffit shoe
- Optional

#### 4050-3049SCNS Spring HCUSH Arm

- Non-handed
- For abusive applications features solid forged steel main arm and forearm with spring loaded stop in the soffit shoe
- Handle controls hold-open function
- Optional

- & Closer available with less than 5.0 lbs. opening force on 36" door.
- \* Maximum opening/hold-open point with standard template.

### Mounting details

Stop face (Push Side) Mounting

Butt Hinges	Should not exceed 5" (127 mm) in width		
Auxiliary Stop	<ul> <li>Recommended at hold-open point or where a door cannot swing 110°.</li> <li>Optional track bumper assembly assists backcheck in cushioning the opening swing of the door</li> <li>It is not intended to replace an auxiliary stop</li> </ul>		
Clearance	Projects 2-1/4" (57 mm) from face of door		
Top Rail	<ul> <li>Less than 5-1/4" (133 mm) measured from the stop, requires PLATE, 4110T-18</li> <li>Plate requires 2-1/4" (57 mm) minimum</li> </ul>		
Stop Width	Minimum 1-1/4" (32 mm)		
Maximum Opening	<ul> <li>Templating allows 110° with standard track arm, limited to 100° with optional bumper tracks</li> <li>Variable hold-open angles with infinite options</li> </ul>		

### Notes:

- $\cdot$  Many track style door closers are capable of allowing 180° of door swing
- The majority of track style closers are at their weakest closing force in the 180° 130° range
- $\cdot$  Consult factory for applications where door must swing 180°

### Product selection guide

Surface mounted 1000 Series LCN closers feature a modern slim line design for easy installation on narrow head frames and top rails. This guide is based on the desired mounting of the closer. NOTE: For parallel mounts order "P" version to also receive PA Shoe.

# **Product comparison**

This chart shows a basic comparison of LCN 1000 Series closers. Refer to the specific closer chapter for complete details.

- AVAILABLENOT AVAILABLE
- Closer available with less than 5.0 lbs. opening force on 36 "door."
- \* Maximum opening/hold-open point with standard template. See individual closer series for degrees of opening per installation.
- D = For designer series only.

### 1000 Series surface mounted closers

### **APPLICATIONS**

- For aluminum, hollow metal, or wood swinging doors and frames.
- Can be used with hinge or pivot mounted door.
- Mounts on 1-3/4" transom without adapter plates.
- Adapter plates and other installation accessories available for unusual conditions.

### **FEATURES COMMON TO 1000 SERIES**

- 1000 series closers mount three ways. Closers with regular or holdopen arm mount hinge side or top jamb. Parallel arm, closers include -62PA SHOE required for parallel arm mount. 1460T mounts hinge side, top jamb (pull side) and stop face.
- Non-handed for right and left swinging doors.
- Closers to meet ADA reduced opening force requirements.
- Adjustable hydraulic backcheck cushions opening swing prior to 90°.
- Separate regulation of general closing speed and latching speed.
- Joints in arm and shoe adapt to uneven trim.
- Reversible shoe to boost latching power on double lever arms.

### **DESIGN ASSISTANCE**

LCN has been providing reliable solutions to unique door control problems since 1925. Design and specification assistance are only a phone call away. Contact LCN for assistance or technical information at **877-671-7011** or **FAX 800-248-1460 (Order Entry)**, Fax **815-879-1495** for Product Support.

### **WARRANTY**

- 30 year limited warranty (1460 Series) and 20 year limited warranty (1260 Series) on cast iron closers.
- 15 year limited warranty (1250 series) and 25 year limited warranty (1450 series) on cast aluminum closers.

See General Information Section for complete warranty details.

### **SPECIFICATIONS**

Refer to "SPECIFICATIONS" section for suggested architectural specifications.

### **MATERIALS**

- High strength cast iron (1260, 1460, 1460T) or cast aluminum (1250, 1450) cylinder.
- Forged steel main arm for all EDA, Cush, 1460HD and 1460T Arms.
- One piece forged steel piston.
- Heat treated pinion.
- LCN's standard all weather fluid performs to temperature ranges from 120°F (49°C) to -30°F (-35°C).
- **High efficiency, full complement**, low friction bearings.
- Tamper resistant regulating screws.
- Full rack and pinion hydraulic action.
- Quiet, low friction track and roller combination for all single lever arm closers.

#### **FINISHES**

- Available in six standard or a wide selection of optional custom powder coat finishes to blend with door and frame.
- LCN's powder coat finish surpasses 100 hours of salt spray which is over four times the ANSI standard for corrosion resistance.

- Painted finishes on cast aluminum closers (1250, 1450).
- For installations where a higher level of corrosion resistance is required, LCN offers an optional special rust inhibiting (SRI) pretreatment (cast iron). Closers that combine the exclusive LCN powder coat finish and the SRI pre-treatment exceed the ANSI standard for corrosion resistance even further.
- Plated finishes are available as an option to accent door and frame for the 1460 Series closers.

### **LISTINGS & APPROVALS**

UL listed for self-closing doors without hold-open under "SWINGING DOOR CLOSERS" (GVEV) file R 1943. Tested and certified under ANSI Standard A156.4 grade one. Consult factory for details. Consult factory for other listings such as; cUL, California State Fire Marshal, Bureau of Standards and Appeals.

### **POSITIVE PRESSURE**

LCN closers have been certified for three hours by UL to be in compliance with UL 10 C. Contact LCN for specific details on door closer fire ratings.

### **FASTENERS**

1260, 1460, 1460T series closers are shipped with: A standard SELF-REAMING and TAPPING SCREW (SRT) pack that contains Philips head SRT screws to install the closer. 1250 and 1450 series closers are shipped with: A universal screw pack to include self reaming and tapping screws (SRT), machine screws and wood screws. Standard LCN thru bolts (TB) can be installed on 1-3/4" (44 mm) thick doors with 1/4-20 machine screws. Optional thru bolt (TB) sizes are available for 1-5/8" (41 mm) or 1-3/8" (35 mm) door thickness, but this must be specified when ordering.

#### Notes:

1. For Thru Bolts, specify door thickness if other than 1-3/4" (44 mm). Represented in diagram as dimension "X".

2. Phillips head, metric machine screws are available, please specify.

3. LCN recommends the use of wood screws in wood door applications.

#### **MAINTENANCE**

Closers mounted according to LCN installation instructions require no periodic maintenance or adjustments..

The 1250 Series cast aluminum closer is designed for low-frequency and low abusive traffic areas. This cast aluminum closer is ideal for aluminum storefronts, interior offices and many other applications. Combining dependable operation, low maintenance and a patented stylish look - with or without the optional slim line cover. And with the most common hole pattern in the industry, the 1250 Series is the perfect choice for easy aftermarket replacement.

Reveal	Should not excee	Should not exceed 3/4" (19 mm) for regular arm or 1/2" (13 mm) for hold-open arm				
Top Rail	Less than 2-3/8″	Less than 2-3/8" (60 mm) requires PLATE, 1250-18				
Clearance	3-1/16" (78mm) l	3-1/16" (78mm) behind door required for installation.				
Maximum opening		A = 6-11/16" (170mm) B = 12-7/16" (316 mm)				
		A= 5-11/16" (144mm) B = 11-7/16" (291 mm)				
	A= 3-1/16" (78 mm) B = 8-15/16" (227 mm)					
	Hold-open points *Frame and trim perm	s up to maximum opening with hold-open arm nitting.				

### Mounting details

Top Jamb (Push Side) Mounting

Butt Hinges	Should not exceed 5" (127 mm) in width			
Auxiliary Stop	Recommended at hold-open point or where a door cannot swing 180°			
Reveal	Arm Type		Maximum Reveal	Opening
	Regular Arm		0″ to 5″	180°
	Long Arm		4" to 8"	165°
	Hold-Open Arr	n	0" to 2-3/4"	180°
	Long Hold-Open Arm		2″ to 6-1/2″	180°
Top Rail	Requires 1-3/4" (44 mm) minimum. 2-1/2" (64 mm) minimum with closer on PLATE, 1250-18			
Head Frame	Less than 1-3/4" (44 mm) requires PLATE, 1250-18. For flush ceiling condition with 2" (51 mm) head frame, use PLATE, 1250-18. (Plate requires 1-3/8" (35 mm) minimum.)			
Maximum opening	100°:	A = 7-3/16" (18 B = 12-15/16"	•	
	101º to 120º:	A= 5-11/16" (144 mm) B = 11-7/16" (291 mm)		
	or *121° to 180°: A= 3-1/16″ (78 mm) B = 8-15/16″ (227 mm)			
	Hold-open poi		um opening with hold-open arm	

### Mounting details

Parallel Arm (Push Side) Mounting

The 'A' dimension refers to the edge of the closer body to the center line of pivot or hinge. The 'B' dimension refers to the edge of the closer shoe bracket to the center line of pivot or hinge.

Butt Hinges	Should not exceed 5" (127 mm) in width		
Auxiliary Stop	Recommended at hold-open point, where a door cannot swing 180°, or where CUSH-N-STOP arm is not used		
Top Rail	Less than 4-1/2" (114 mm) measured from the stop requires PLATE, 1250-18PA		
Clearance	1250-62PA shoe projects 4-1/8" (105 mm) from door face		
Stop Width	Minimum 1" (25 mm)		
Blade Stop	Clearance, requires 1/2" (13 mm) BLADE STOP SPACER, 1250-61		
Auxiliary Shoe	1250-62A allows installation of regular arm with overhead holder/stop		
Maximum opening	Regular or hold-open arm can be templated to 100°: $A = 7-5/16$ ″ (186 mm) $B = 8-5/8$ ″ (219 mm)		
	or 101° to 130°: A= 5-13/16″ (148 mm) B = 7-1/8″ (181 mm)		
	or *131º to 180º: A= 3-13/16" (97 mm) B = 5-1/8" (130 mm)		
	Hold-open points up to maximum opening with hold-open arm. *Frame and trim permitting.		

### Note:

· 1250 Parallel arm closer includes 1250-201 FIFTH HOLE SPACER to support PA SHOE

### **EDA** mount

Mounting details

EDA and CUSH -N-STOP mounting

### **CUSH/SCUSH mount**

The 'A' dimension refers to the edge of the closer body to the center line of pivot or hinge. The 'B' dimension refers to the edge of the closer shoe bracket to the center line of pivot or hinge.

Clearance	1250-62EDA or CUSH shoe projects 5-11/16″ (144mm) from door face				
Head Frame	Flush or rabbeted requires CUSH FLUSH PANEL ADAPTER, 1250-419				
EDA or CUSH ARM	Requires soffit SHOE SUPPORT, 1250-30 for fifth screw anchorage where reveal is less than 2-3/4" (70mm)				
Spring CUSH	Dead stop points are approximately 5° more than templated stop point.				
Maximum opening	EDA template allows 180°. Hold-open point up to maximum opening	CUSH arms can be templated for maximum opening hold-open point at 85°			
	100°: A = 7-5/16" (186mm) B = 9" (229 mm)	85°:	A = 8-13/16" (224 mm) B = 10-1/2" (267 mm)		
	or 130°: A = 5-13/16″ (148 mm) B = 7-1/2″ (191 mm)	90°:	A = 8-1/16" (205 mm) B = 9-3/4" (248 mm)		
	or 180°: A = 3-13/16″ (97 mm) B = 5-1/2″ (140 mm)	100°:	A = 6-11/16" (170 mm) B = 8-3/8" (213 mm)		
		105°:	A = 6-1/16" (154 mm) B = 7-3/4" (197 mm)		
		110°:	A = 5-7/16" (138 mm) B = 7-1/8" (181 mm)		

Note:

• 1250 closers ordered with EDA, CUSH or SPRING CUSH arms include 1250-201 FIFTH HOLE SPACER to support the shoe

### **Cylinders**

#### **Installation Accessories**

#### 1260-18 Plate

- Required for hinge side mount where top rail is less than 2-1/2" (64 mm)
- Required for top jamb mounting where head frame is less than 1-3/4" (44 mm) or flush ceiling condition exists
- Requires minimum 1-1/2" (38 mm) minimum top rail or 1-1/4" (32 mm) head frame

#### 1260-18PA

### Plate

- Required for parallel arm mounting where top rail is less than 4-3/8" (111 mm), measured from the stop
- Requires 1-3/4" (44 mm) minimum top rail

### 1260-18QF

### Quick Fix™ Bracket Kit

- Optional kit includes retro-fit mounting plates for 1371 closer cylinder and shoe
- Useful in applications when previously drilled holes are damaged

### 1260-30

### **CUSH Shoe Support**

 Provide anchorage for fifth screw used with CUSH arms where reveal is less than 3-1/16" (78 mm)

#### 1260-61 **Blade Stop Spacer**

 Lowers parallel arm shoe to clear 1/2" (13 mm) blade stop

#### 1260-62A **Auxiliary Shoe**

- Requires a top rail of 7" (178
- Optional shoe replaces-62PA for parallel arm mounting of regular arm with overhead holder/stop

### 1260-419

### PA Flush Panel Adapter

 Provides horizontal mounting surface for PA, EDA or CUSH shoe on single rabbeted or flush frame

### 1260-62PA

### PA Shoe

 Required for parallel arm mounting

**C16** 

### **Arms**

### 1260-3077 Regular Arm

- Non-handed
- Mounts hinge side or top jamb
- Parallel Arm includes PA SHOE, 1260-62PA required for parallel arm mounting

1260-3049L Long Hold-open Arm

- Non-handed
- Includes LONG HEAD AND TUBE, 1260-3048L for top jamb mount with deep reveals
- Optional

### 1260-3077CNS Cush-n-Stop® Arm

- Non-handed
- Features solid forged steel main arm and forearm with stop in soffit shoe
- Optional

### 1260-3077L Long Arm

- Non-handed
- Includes LONG ROD AND SHOE, 1260-79LR for top jamb mount with deep reveals
- Optional

### 1260-3049 Hold-open Arm

- Non-handed
- Mounts hinge side, top jamb or parallel arm (62PA required)
- Hold-open adjustable at shoe
- Optional

#### 1260-3077EDA

Extra Duty Arm

- Non-handed
- Features solid forged steel main and forearm for potentially abusive installations
- Optional 1260-3077EDA/G for blade stop clearance

### 1260-3077EDA/62G

Extra Duty Arm w/62G

- Non-handed
- Features solid forged steel main and forearm for potentially abusive installations

#### 1260-3049EDA

Hold-Open Extra Duty Arm

- Handed arm
- Provides hold-open function adjustable at shoe
- Optional

#### 1260-3049CNS **HCUSH Arm**

- Non-handed
- Provides hold-open function with templated stop/hold-open points.
- Handle controls hold-open function
- Optional

### Interior door width

Indicates recommended range of door width for closer size. \* Adjustable Size 1 thru 6.

# Reduced opening force 1450 Series closers

CAUTION! Any manual door closer, including those certified by BHMA to conform to ANSI Standard A156.4, that is selected, installed and adjusted based on ADA or other reduced opening force requirements may not provide sufficient power to reliably close and latch a door.

Refer to POWER OPERATORS section for information on systems that meet reduced opening force requirements without affecting closing power.

*	Maxi	mun	n onei	ning	torce

# **Notes**

# Product selection guide

The concealed LCN closers feature a modern design for concealment in either the head frame or top rail of the door. This guide is based on the desired mounting of the closer.

<sup>\*\*</sup> INDICATES HIGH SECURITY CLOSER, DOOR POSITION SWITCH OPTIONAL. REFER TO HIGH SECURITY SECTION OF THE CATALOG.

# Product comparison

This chart shows a basic comparison of LCN concealed closers. Refer to the specific closer chapter for complete details.

AVAILABLENOT AVAILABLE

<sup>\*</sup> Maximum opening/hold-open point with standard template. See individual closer series for degrees of opening per installation.

<sup>\*\*\*</sup> INDICATES FIRE LIFE SAFETY CLOSER. REFER TO FIRE LIFE SAFETY SECTION.

<sup>&</sup>amp; Closer available with less than 5.0 lbs. opening force on 36 "door.

# Concealed closer series

### **APPLICATIONS**

- For aluminum, hollow metal, or wood doors and frames.
- Can be used with hinge or pivot mounted door.
- Closers for 4" or minimum 1-3/4" head frame or 4" top rail.
- Mounting clips for wood frames and other installation accessories available for unusual conditions.
- For concealed in door closers consult factory for installations with pivots.

### FEATURES COMMON TO CONCEALED CLOSERS

- Mountings for head frame or door top rail.
- Handed for right or left swinging doors. (except 6030)
- Closers to meet ADA reduced opening force requirements.
- Adjustable hydraulic backcheck cushions opening swing prior to 90°.
- Separate regulation of general closing speed and latching speed.
- Joints in arm and shoe adapt to uneven trim. (for double lever arms)

### **DESIGN ASSISTANCE**

LCN has been providing reliable solutions to unique door control problems since 1925. Design and specification assistance are only a phone call away. Contact LCN for assistance or technical information at 877-671-7011 or FAX 800-248-1460 (Order Entry), Fax 815-879-1495 for Product Support.

### **WARRANTY**

15 year limited warranty. See General Information Section for complete warranty details.

### **SPECIFICATIONS**

Refer to "SPECIFICATIONS" section for suggested architectural specifications.

### **MATERIALS**

(Closers concealed in the door or frame)

- High strength cast iron cylinder.
- Forged steel main arms (except 6030).
- One piece forged steel piston.
- All weather fluid in overhead concealed models performs to temperature ranges from 120°F (49°C) to -30°F (-35°C) without any seasonal adjustment.
- High efficiency, full complement, low friction bearings.
- Tamper resistant regulating screws.
- Full rack and pinion hydraulic action.
- Quiet, low friction track and roller combination for all single lever (standard) arm closers.

### **FINISHES**

- Available in six standard or a wide selection of optional custom powder coat finishes to blend with door and frame.
- LCN's powder coat finishes surpass 100 hours of salt spray which is over four times the ANSI standard for corrosion resistance.
- For installations where a higher level of corrosive resistance is required, LCN offers an optional special rust inhibiting (SRI) pretreatment. Closers that combine the exclusive LCN powder coat finish and the SRI pre-treatment exceed the ANSI standard for corrosion resistance even further.
- Plated finishes are available as an option to accent door and frame.
   (SRI not available with plated finishes)

### **LISTINGS & APPROVALS**

UL listed for self-closing doors without hold-open under "SWINGING DOOR CLOSERS" (GVEV) file R 1943.

Tested and certified under ANSI Standard A156.4. Consult factory for details.

Consult factory for other listings such as; cUL, California State Fire Marshal, Bureau of Standards and Appeals.

### **POSITIVE PRESSURE**

LCN closers have been certified for three hours by UL to be in compliance with UL 10 C. Contact LCN for specific details on door closer fire ratings.

### **FASTENERS**

Standard WOOD and MACHINE SCREW (WMS) pack contains phillips head wood and machine screws to install the closer.

TORX machine screws are available for some closers.

Note 1: Phillips head, metric machine screws are available, please specify.

### **MAINTENANCE**

Closers mounted according to LCN installation instructions require no periodic maintenance or adjustments.

The concealed 2010 Series is a heavy duty closer designed to provide complete concealment. The single lever arm and roller assembly provide smooth, quiet door control and the choice of finishes and track functions meet virtually all architectural requirements.

# Product selection guide

SENTRONIC® Series LCN closer/holders combine heavy duty closers with electrically controlled holdopen functions to control fire and smoke barrier doors. This guide is based on the desired mounting of the unit.

<sup>\*\*</sup> See SEH section (cylinder not included).

# Product comparison

This chart shows a basic comparison of Sentronic closer/holders. Refer to the specific product chapter for complete details..

AVAILABLENOT AVAILABLE

<sup>\*\*\*</sup> SEM 7800 Series are die cast.

<sup>\*</sup> Maximum hold-open with standard template. See individual closer series for degrees of opening and hold-open per installation.

# Fire/Life Safety Closers/ Holders Series

# SENTRONIC® CLOSER/HOLDERS

Automatic detection and containment of fire and smoke are the best ways to minimize danger to life and property. Patented Sentronic door closer/holders are designed to hold swinging doors open in normal use and release and automatically close the doors under fire conditions. Conforms to major building codes, life safety codes (eg. NFPA 101) and ANSI A156.15.

# **SINGLE POINT HOLD-OPEN (SE)**

SE Series offers adjustable single point hold-open function controlled by solenoid assembly located in the SE track.

# **MULTI-POINT HOLD-OPEN (ME)**

ME Series offers infinitely adjustable, multi-point hold-open function controlled by solenoid on the cylinder assembly.

# **HOLDER SCANNER ACTIVATED (HSA)**

Electronically controlled closer/ holder designed to provide easy passage for groups of pedestrians through high traffic doors. Best suited for high traffic emergency exit doors.

# **MAGNETS (SEM) - ELECTROMAGNETIC DOOR HOLDERS**

SEM Series magnets work with manual door closers to provide single point hold-open. Now available in new **tri-voltage** with 35 lbs. of holding force.

# **APPLICATIONS**

- For fire and smoke barrier doors.
- Integrated into larger system.
- Surface and concealed mountings.
- Remote control hold-open function of executive and conference area doors.
- Adapter plates and other installation accessories available for unusual conditions.

# **GENERAL NOTES**

- Note 1: For installations where 120V AC input voltage is supplied, 120V/24V transformer, 4040SE-3210, is required to reduce line voltage for 24V holding solenoid. Units are available in either 24V or 120V input, please specify.
- Note 2: Transformer 4040SE-3210 mounted on cover plate to fit 4'' (102 mm)  $\times 4'' \times 2-1/8''$  (54 mm) junction box (by others).
- Note 3: SE track quick-connector is required for 1/2 " conduit.
- Note 4: SE test switch assembly includes fuse to protect solenoid. Works with ionization, photoelectric and heat sensing detectors (by others).

# **SE WIRING DIAGRAM**

# LISTINGS AND APPROVALS

Sentronic closer/holders are listed by Underwriters Laboratories, Inc. in the following product categories under FIRE DOORS (GSNV), Combination Door Closers and Holders (GTIS) file R7050. SEM 7800 Series magnets are listed under Door Holders (GTPR) file R8327.

Consult the factory for other listings, such as; cUL, Department of Labor and Industry of the Commonwealth of Pennsylvania, The Board of Standards and Appeals of the City of New York, Fire and Panic Safety Standards of the California State Fire Marshal.

### HOLDING SOLENOIDS CURRENT DRAW

#### SE/ME

24V AC/DC (+10% -15%) @ 90 mA max. 120V AC/DC (+10% -15%) @ 30 mA max.

#### SEM (TRI-VOLT)

12V DC (+10% -15%) @ 30 mA max. 24V AC/DC (+10% -15%) @ 20 mA max. 120V AC (+10% -15%) @ 20 mA max.

#### **HSA**

24V AC/DC (+10% -15%) @ 120 mA max.

#### TRANSFORMER DATA

120V AC 50-60 Hz (primary); 24V AC @ 400 mA max. (secondary) An LCN supplied transformer will power (recommended) 2 SE, 3 SE/ME, and 15 SEM.

#### ME WIRING

ME "ON/OFF" switch assembly includes trim pot to adjust pull out force and fuse to protect solenoid.

# ME (4310, 4410) WIRING DIAGRAM (24V only)

ME (2310) WIRING DIAGRAM

#### **HSA WIRING**

HSA "On/Off" switch assembly includes trim pot to adjust hold-open time and fuse to protect solenoid.

**HSA WIRING DIAGRAM** 

# FEATURES COMMON TO FIRE/LIFE SAFETY CLOSERS

- 24V AC/DC or 120V AC input, please specify for SE or ME.
- When current is interrupted, hold-open releases and door closes.
- Adjustable hydraulic backcheck cushions opening swing prior to 90°.
- Separate regulation of general closing speed and latching speed.
- Available in a wide range of powder coated finishes to blend with door and frame. SEM magnets available in Aluminum and Dark Bronze only.
- Circuit automatically handles AC or DC input.
- Can be pushed safely and easily out of hold-open.
- Functions as a full rack and pinion door closer when hold-open is not engaged or current is interrupted.
- Works with ionization, photoelectric and heat sensing detectors (by others).

# WARRANTY

2 year limited warranty. See General Information Section for complete warranty details..

#### **SPECIFICATIONS**

Refer to "SPECIFICATIONS" section for suggested architectural specifications.

# **DESIGN ASSISTANCE**

LCN has been providing reliable solutions to unique door control problems since 1925.

Contact LCN for assistance or technical information at 877-671-7011 or FAX **800-248-1460 (order entry)**, Fax **815-879-1495** for Application Engineering.

# **MATERIALS**

- High strength cast iron cylinder.
- Forged steel main arm.
- One piece **forged steel** piston.
- All weather fluid eliminates seasonal adjustments.
- **High efficiency, full complement**, low friction bearings.
- Tamper resistant regulating screws.
- Quiet, low friction track and roller combination for all single lever arm closers.

- Available in six standard or a wide selection of optional custom powder coat finishes to blend with door and frame.
- LCN's powder coat finishes surpass 100 hours of salt spray which is over four times the ANSI standard for corrosion resistance.
- Plated finishes are available as an option to accept door and frame.

#### **MAINTENANCE**

Closers mounted according to LCN installation instructions require no periodic adjustments. Quarterly inspections are recommended. Refer to the installation instructions for complete, product specific details.

# **POSITIVE PRESSURE**

LCN closers have been certified for three hours by UL to be in compliance with UL 10 C. Contact LCN for specific details on door closer fire ratings.

### **FASTENERS**

Standard WOOD and MACHINE SCREW (WMS) pack contains phillips head wood and machine screws to install the closer. Thru Bolts and/or TORX® machine screws are available for most closers. LCN thru bolts (TB) can be installed on 1-3/4" thick doors with either the 1/4-20 machine screws or optional TORX screws supplied with the closer. Optional sizes are available for 1-5/8" or 1-3/8" door thicknesses, but this must be specified when ordering.

NOTE 1: For Thru Bolts, specify door thickness if other than 1-3/4" (44 mm). NOTE 2: Phillips head, metric machine screws are available on special order.

# **Notes**

Magnets

The Sentronic® SEM 7800 Series are heavy duty, electrically controlled door holding magnets. Magnets are fail safe and hold until the current is interrupted. A manual door closer is used to control and close the door. A choice of floor, recessed wall, or surface mounted wall magnets are available.

Certifications	Grade 1 - ANSI A156.15, UL 10C for metal smoke barrier or labeled door, ADA, Life Safety Code, NFPA 101, 100 Hour Salt Spray, Meets BAA - Buy American Act	
Voltage	Tri-voltage design with 35 lbs. of holding force	
Housing	Die cast	
Fasteners	Wood and machine screw pack	
Finishes/Colors/ Powder Coat	Available in Aluminum and Dark Bronze only	
Options	Now available with armature extensions (see page 11)

#### Operation:

Electromagnets are typically used with fire alarm systems. Doors are held open in the non-alarm condition. When the fire alarm panel enters the alarm condition, power to the electromagnets is removed, the doors close under door closer control, and function as a manual door. When the fire alarm panel returns to the non-alarm condition, power is reapplied to the electromagnets and the doors can be held open again.

### Interior door width

Indicates recommended range of door width for closer size.

NOTE: For SE, minimum door width 28" (711mm) For SEL, minimum door width 32" (813mm)

The 4310ME SENTRONIC® is a heavy duty, electrically controlled closer/holder designed to provide infinitely adjustable hold-open for fire and smoke barrier doors. Door is held open until current interruption releases mechanism and the door closes. Single lever (track) arm closer is specifically designed for interior doors. Choice of finishes, cylinder functions, and installation accessories meet virtually all life safety requirements. An ME provides only the closer / holder function.

### **Notes**

The 4310HSA SENTRONIC® is an electrically controlled closer/holder designed to provide easy passage for groups of pedestrians through high traffic doors. Pedestrians, moving through the doorway, trigger the built-in scanner. When the door is opened to 80° or more, the door is electrically held open to minimize wear and tear on applied door hardware. After the last pedestrian in a group passes through the doorway, the system timer releases the hold-open, closing the door under control of the heavy duty closer. Single lever (track) arm closer is specifically designed for pull side mounting. Choice of finishes and accessories meet virtually all high traffic installation requirements.

Indicates recommended range of door width for closer size.

The SEH SENTRONIC® is a holder designed to provide single point hold-open for fire and smoke barrier doors that must be used with an opposite side mounted UL listed door closer. The door is held open until current interruption releases the holding mechanism and the door closes. Single lever (track) arm is specifically designed for interior doors. Choice of finishes, track functions, and installation accessories meet virtually all life safety requirements.

Circuitry accepts either AC or DC input</li> </ul>
Options	<ul><li>24V or 120V volt input for SEH, please specify</li></ul>
Wiring Diagram	See "FIRE/LIFE SAFETY" section page 19 for typical wiring and electrical diagram
lotos	

- · Information applies to SEH unless otherwise specified
- · Standard SEH Series is a door holder that must be installed in conjunction with an opposite side mounted, UL listed door closer
- · Hold-open force is adjustable
- $\cdot \textit{Momentary on/off switch board assembly for testing door release also provides over-voltage protection. \textit{Field replaceable} \\$
- · All SEH type holders require a separate closer for fire or smoke barrier door applications

### Arm

**SEH-3077T** Holder Arm

- Non-handed
- Can be combined with any 4040SE Series track to provide an electrically controlled holdopen function on either side of the door
- All SEH type holders require a separate closer for fire or smoke barrier door applications

### **Track**

### SEH-3038 **SEH Track**

- Non-handed
- Mounts on either head frame or stop
- 24V or 120V AC/DC input for holding solenoid, please specify
- Includes test switch assembly with fuse
- Standard

### **Switch**

**SEH-3436 Test Switch** 

### **Installation Accessories**

### **SEH-81**

Conduit Quick-Connector

 Two piece connector for use with 1/2" conduit

### **SEH-3034SE**

Track Roller & Track Slider

- Quiet, low friction roller assembly
- Shoulder dimension "X" = 1/4" (6 mm)
- Alloy metal slider for use in SE series tracks only

### 4040SEH-3210

Transformer

- Reduces line voltage from 120V to 24V AC
- Mounted on cover for 4" (102 mm) x 4" x 2-1/8" (54 mm) junction box (by others)

### SEH Series

### Closer will be shipped with:

- Standard arm
- Standard track
- Wood & machine screw pack unless options listed below are selected.

### Product selection guide

High Security LCN closers feature a vandal resistant design engineered for each application, easy installation, and superior performance. This guide is based on the desired mounting of the closer.

### Product comparison

This chart shows a basic comparison of LCN High Security closers. Refer to the specific closer chapter for complete details.

- AVAILABLENOT AVAILABLE
- & Closer available with less than 5.0 lbs. opening force on 36 " door.
- \*\* Maximum opening with standard template. See individual closer series for degrees of opening per installation.
- \*\*\* Advanced Variable Backcheck.

### High Security Closers Series

### **APPLICATIONS**

- For any concealed or surface mounted installation subject to potential abuse or vandalism.
- For correctional, aluminum, hollow metal, or wood doors and frames.
- Can be used with hinge or pivot mounted door.
- Adapter plates and other installation accessories available for unusual conditions.

### FEATURES COMMON TO HIGH SECURITY CLOSERS

- Each closer is a vandal resistant design for a specific mounting; hinge side, parallel arm, stop face, or concealed.
- All high security closers are based on a cylinder certified to exceed 10,000,000 cycles in independent testing.
- Handed for right or left swinging doors.
- Closers to meet ADA reduced opening force requirements.
- All closers furnished with TORX tamper resistant machine screws.
- All surface mount closers include a heavy gauge steel cover with four attachment points.
- All closer adjustments are protected when installation is complete.
- All track closers use a jam resistant track and tamper resistant arm/ roller assembly.
- Adjustable hydraulic backcheck cushions opening swing prior to 90°.
- Advanced variable backcheck (AVB) is available on all high security closers
- Separate regulation of general closing speed and latching speed.

### **DESIGN ASSISTANCE**

LCN has been providing reliable solutions to unique door control problems since 1925. Design and specification assistance are only a phone call away. Contact LCN for assistance or technical information at **877-671-7011** or FAX **800-248-1460 (order entry)**, Fax **815-879-1495** for Technical Support.

### WARRANTY

High Security Series closers carry a 15 year limited warranty, except for the 2210DPS Series closer that carries a 2 year limited warranty. See General Information Section for complete warranty details.

### **MATERIALS**

- High strength cast iron cylinder.
- Forged steel main arms and forearms.
- One piece forged steel piston.
- LCN's all weather "Liquid X" fluid performs to temperature ranges from 120°F (49°C) to -30°F (-35°C) without any seasonal adjustment.
- High efficiency, full complement, low friction bearings.
- Double heat treated pinions.
- Tamper resistant regulating screws.
- Full rack and pinion hydraulic action.
- Quiet, low friction track and roller combination for all single lever arm closers.

### **FINISHES**

- Available in six standard or a wide selection of optional custom powder coat finishes to blend with door and frame.
- LCN's powder coat finishes surpass 100 hours of salt spray which is over four times the ANSI standard for corrosion resistance.
- For installations where a higher level of corrosive resistance is required, LCN offers an optional special rust inhibiting (SRI) pre-treatment.
   Closers that combine the exclusive LCN powder coat finish and the SRI

pre-treatment exceed the ANSI standard for corrosion resistance even further.

Plated finishes are available as an option to accent door and frame.

### **LISTINGS & APPROVALS**

UL listed for self-closing doors without hold-open under "SWINGING DOOR CLOSERS" (GVEV) file R 1943.

Tested and certified under ANSI Standard A 156.4. Consult factory for details.

Consult factory for other listings such as; ULC, California State Fire Marshal, Bureau of Standards and Appeals.

### POSITIVE PRESSURE

LCN closers have been certified for three hours by UL to be in compliance with UL 10 C. Contact LCN for specific details on door closer fire ratings.

### **FASTENERS**

TORX MACHINE SCREW (TORX) pack contains tamper resistant machine screws to install the closer. Thru Bolts for TORX machine screws are available for all high security closers, except 2210 series.

LCN thru bolts (TB) can be installed on 1-3/4" thick doors with the 1/4-20 TORX screws supplied with the closer. Optional sizes are available for 1-5/8" or 1-3/8" door thicknesses, but this must be specified when ordering.

Note 1: For Thru Bolts, specify door thickness if other than 1-3/4" (44mm).

Special driver bits are required for installation or removal of TORX machine screws with a security pin as supplied with LCN High Security closers. All bits fit a 1/4" hex drive socket. For 1/4-20 screws use T-27, for #12 machine screws use T-25, for 10# machine screws use T20, for #8 (and undercut #10) machine screws use T15, and for #6 machine screws use T10. The specific bits required for installation are listed on the "HOW TO ORDER" page for each closer. Sold separately.

### **FASTENERS**

TORX MACHINE SCREW (TORX) pack contains tamper resistant machine screws to install the closer. Thru Bolts for TORX machine screws are available for all high security closers, except 2210 series.

### **SPECIFICATIONS**

Refer to "SPECIFICATIONS" section for suggested architectural specifications.

The concealed 2210 Series, heavy duty, high security track closer features complete concealment with special components to minimize tampering and vandalism. Forged steel, single lever arm and heavy steel mounting plate are designed for correctional, vandal prone, institutional, and other high traffic applications. A choice of finishes and cylinder functions meet correctional and vandal resistant requirements.

2210DPS-3038

- Handed
- Cast iron

### **Arms**

### 2210-3077T 2210DPS-3077T

### Standard Security Arm

- Handed
- Solid forged steel and large cross section for potentially abusive installations
- Special threaded attachment of track roller for extra security
- Double slab arm/pinion attachment for maximum strength
- Can only be used with high security track roller, 2210-3034 or 2210DPS-3034
- Roller is included with arm when either the 2210-3077T or 2210DPS-3077T are ordered separately

### **Tracks**

### 2210-3038

### Security Track

- Non-handed
- Hold-open function not available
- Designed to eject foreign objects placed in track during either opening or closing motion
- Requires track roller, 2210-3034

### **Finish Plates**

### 2210-11

### Long Plate

- Heavy gauge metal plate
- Required for complete enclosure
- Six point TORX® mounting screws for extra security
- Closer adjustments not accessible with finish plates installed

### 2210-12 Short Plate

- Heavy gauge metal plate
- Required for complete enclosure
- Four point TORX® mounting screws for extra security
- Closer adjustments not accessible with finish plates installed

### **Installation Accessories**

### 2210-3034

### Security Track Roller

- Low friction track roller threads into 2210-3077T arm for extra strength and security
- Can not be removed without disconnecting arm from closer

### 2210-493

### Test Kit

- Battery operated designed to verify switch signal response point
- Can be used directly at door location (used for 2210 DPS only)

The 4510 SMOOTHEE® Series is a heavy duty, high security closer with special components to minimize tampering and vandalism. Forged steel double lever arms and heavy gauge metal security covers are designed for correctional, vandal prone, institutional and other high traffic applications. The closer has passed 10 million cycles in independent testing. A choice of finishes and cylinder functions meet correctional and vandal resistant requirements.

# Product selection guide

LCN automatic operators are the proven standard in schools and health care facilities for over 20 years. They are easily retrofitted into existing doors and frames, as well as new construction. LCN low energy electrohydraulic and pneumatic automatic operators feature a heavy duty closer with a slow opening function. LCN's electromechanical automatic operators utilizes a motor gearbox and control box to perform the opening and closing function.

# Automatic Operators

# Product comparison

# Electrohydraulic/Pneumatic Product Comparison

This chart shows a basic features comparison of the LCN electrohydraulic and pneumatic power operator systems designed to provide easy access without sacrificing closing power. Refer to the specific closer chapter for complete details.

- AVAILABLENOT AVAILABLE
- Meets ADA requirements (power mode).

- AVAILABLENOT AVAILABLE
- \*\*\* All electromechanical operators open to 90º.
- \*\*\*\* Handed for 2850 and 2860, double egress only.

#### WHAT IS THE ADA?

The ADA is a civil rights law, not a building code. This act is designed to provide protection for people with disabilities. The law is divided into four major titles that prohibit discrimination against the disabled in Employment, Title I, Public Services and Transportation Title II, Public Accommodations Title III, and Telecommunications Title IV. Title III concerns doors and door controls.

# WHAT IS THE INTENT OF ADA, TITLE III?

Essentially, owners of certain types of buildings must remove barriers and provide people with disabilities with access equal to, or similar to, that available to the general public. The deadline for compliance was January 26. 1992.

The final rules implementing Title III were published in the Federal Register of July 26, 1991. To obtain a copy or ask questions, contact the U.S. DEPARTMENT OF JUSTICE. Technical information can be obtained from The U.S. ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD.

#### **HOW DOES ADA AFFECT DOORS?**

The ADA defines an "accessible" opening which means, among other things, providing a door with a minimum 32" (813 mm) clear opening, easily manipulated handles, a maximum opening force, a minimum closing time, and capable of opening to at least 90°.

ADA criteria, based on OPENING FORCE, are similar to American National Standards Institute (ANSI) Standard A117.1. This is different from ANSI Standard A156.4. which is based on CLOSING FORCE.

WHAT ARE THE OPENING FORCE LIMITS?

DOOR TYPE	OPENING FORCE
Fire Rated	Note 1
Interior Non-Fire-Rated	5.0 lbs. (22.2 N)
Exterior Non-Fire-Rated	"Reserved"

NOTE 1: All fire rated doors should have the minimum opening force allowable by the appropriate administrative authority, typically the local Fire Marshal. Closing and latching a fire door takes precedence over ADA opening force limits.

#### **HOW IS THE DOOR MEASURED?**

Two ADA criteria affect the door closer selection, adjustments, opening force, and time to close. Since the law does not clearly define the method of measurement, this is LCN's recommendation.

- On the push side of the door, locate a point at the center line of the push plate/lock trim or 34" (864 mm), from the hinge edge of the door, whichever is greater.
- 2. Mark the floor at a point where the push side of the doors' latch stile is at 70°. Mark a second point where the push side is 3″ (76 mm) from the latch
- 3. Open the door so the latch is clear of the strike and the door is slightly off the stop.
- 4. Using a force gauge on the mark determined in Step #1, push the door open to the 70° mark established in Step #2. Observe the force readings. (Accuracy of the readings varies with the gauge quality.)
- 5. Adjust the closer spring power to meet the maximum opening force.
- Hold the door at the 70° mark. Release the door and time the closing sweep between the two marks.
- Adjust the closer main speed regulation valve to obtain a minimum 3 second "time to close".

# **FINISHES**

- Available in six standard or a wide selection of optional custom powder coat finishes to blend with door and frame.
- LCN's powder coat finishes surpass 100 hours of salt spray which is over four times the ANSI standard for corrosion resistance.
- For installations where a higher level of corrosive resistance is required, LCN offers an optional special rust inhibiting (SRI) pretreatment. Closers that combine the exclusive LCN powder coat finish and the SRI pre-treatment exceed the ANSI standard for corrosion resistance even further.
- Plated finishes are available as an option to accent door and frame.

NOTE: Delayed action closers are not necessary to meet the ADA 3 second "time to close" requirement but do offer additional time for people to pass through the door.

**CAUTION!** Any manual door closer, including those certified by BHMA to conform to ANSI Standard 156.4, that is selected, installed, and adjusted based on ADA requirements may not provide sufficient power to reliably close and latch a door. Auto Equalizer systems offer an alternate solution.

# Automatic Operators

# WHAT ARE THE CHOICES FOR ADA COMPLIANT DOOR CONTROLS?

LCN offers both surface and concealed mountings for powered systems or manual closers.

# **POWERED SYSTEMS**

LCN Power Operator Systems offer easy access for the disabled and resolve the problem of obtaining reduced opening force while providing adequate closing force.

#### **POWERED SYSTEMS**

Manual closers rely on reduced spring power to meet opening force requirements. Four principle factors affect the performance of manual closers:

#### 1. DOOR WIDTH:

A wider door provides more leverage for the user, thus reducing the opening force required.

# 2. SPRING POWER:

Adjusting spring power to achieve a lower opening force also reduces the closing force available.

#### 3. ARM SELECTION:

The superior mechanical advantage of a regular arm system offers the user significantly lower average opening forces through the 70° measurement range compared to a standard arm (track type) closer. Regular arms also provide superior latching power.

# REGULAR ARM STANDARD ARM

# TYPICAL ARM POWER CURVE

· "RESERVED", TYPICALLY 8.6 POUNDS

# 4. ADDITIONAL FORCES

Improperly hung doors, stiff latches, HVAC or environmental pressures, and other forces acting on the door require increasing the closer spring power to reliably close and latch a door which produces a corresponding increase in opening force.

- ANSI A156.19 Power Assist and Low Energy Power Operated Doors

# **ELECTROHYDRAULIC & PNEUMATIC FASTENERS**

Standard WOOD and MACHINE SCREW (WMS) pack contains phillips head wood and machine screws to install the closer. Thru Bolts (TB) and/or TORX® machine screws are available for all closers, except the 2610 series. LCN thru bolts can be installed on 1-3/4" thick doors with either the 1/4-20 machine screws or optional TORX security screws supplied with the closer. Optional sizes are available for 1-5/8" or 1-3/8" door thicknesses, but must be specified when ordering.

NOTE 1: Phillips head, metric machine screws are available, please specify.

# **ELECTROMECHANICAL FASTENERS**

Typically installed 1/4 - 20 machine screw for aluminum/steel frames. Wood screws included for wood door mounting. Consult factory for additional information.

# Low Energy Operators

The basic design concept for all LCN power operator systems is door control of both the opening and closing motion of the door. Our designs allow the system to be easily retrofitted into existing doors and frames as well as new construction. A basic LCN electrohydraulic/pneumatic system consists of a power operator based on a heavy duty LCN 4040 Series door closer and peripheral actuators. Our electromechanical automatic operators utilize a motor gearbox and a control box to perform the opening and closing function. LCN offers a choice of either electrohydraulic, electromechanical or pneumatic low energy automatic operators.

# **APPLICATIONS**

- Electrohydraulic and pneumatic systems are used primarily for manual opening with available push button automatic opening.
- Electromechanical systems are used primarily for automatic openings.
- For dedicated handicap access.
- Stand alone or integrated into larger multi-door systems.
- Surface and concealed mountings.
- Installation accessories available for unusual conditions.
- **CAUTION!** For exterior doors exceeding 3′0″ wide by 7′0″ tall, interior doors exceeding 4′0″ wide by 8′0″ tall, or any door exceeding 225 pounds, consult factory before specifying or installing LCN electrohydraulic or pneumatic automatic operators.
- **CAUTION!** For exterior doors exceeding 4′0″ wide by 7′0″ tall, interior doors exceeding 4′0″ wide by 8′0″ tall, or any door exceeding 200 pounds, consult factory before specifying or installing LCN Electromechanical automatic operators.

#### **A156.19 SYSTEM DESIGN PARAMETERS**

- Cycle test standard of 300,000 full load operating cycles.
- Power opening plus full door control.
- Open to backcheck no faster than 3 seconds.
- Opening time to fully open is no faster than 4 seconds.
- Remain fully open for at least 5 seconds.
- Closing time from 90° to 10° is no faster than 3 seconds.
- Less than 15 lb to stop doors motion.
- Kinetic energy must not exceed 1.25 lb-ft.
- In event of failure, less than 15 lb to release latch, less than 30 lb to put door in motion, less than 15 lb to fully open door system.

#### **COMMON SYSTEM FEATURES**

- Power opening plus full door control.
- No guide rails or safety devices required due to low energy design.
- Adjustable opening force.
- Adjustable closing power.
- 4630 and 4810 operators meet ADA reduced manual opening force requirements.
- Electrohydraulic and pneumatic systems feature adjustable backcheck that slows opening swing at about 70°.
- Electromechanical systems feature electronic backcheck that slows opening swing at about 70°.
- Systems allow for separate adjustment of general closing and latch speed
- Electrohydraulic and pneumatic systems are available in six standard finishes or a wide selection of optional custom powder coat finishes to blend with door and frame.
- Electromechanical systems are available in two standard anodized finishes.
- UL & NEC compliant.
- Compatible with most security and safety systems.
- Capable of full integration with high security keypads and card readers.
- Wiring allows for sequential operation for vestibule applications.
   Electromechanical systems require additional components.
- Modular design simplifies installation and maintenance.

#### WARRANTY

 2 year limited warranty. See General Information Section for complete details.

# **MAINTENANCE**

- Operators mounted according to the LCN installation instructions require no periodic maintenance or adjustments.
- Periodic visual inspections are recommended.

# Notes

# PNEUMATIC (AIR) POWERED SYSTEMS

LCN Pneumatic Auto Equalizer systems use the power of pressurized air to do the work of automatically opening the door. These systems have exceeded 3 million full load automatic operating cycles; that's 10 times the industry standard! A basic pneumatic system consists of an automatic operator to provide the door control, a control box that contains the valves and electrical timing circuits, actuators to start the system, and a compressed air source.

# **UNIQUE FEATURES**

# ■ Multi-Door & Single-Door Solutions

The pneumatic automatic operators are ideal for multidoor applications because the cost per door leaf decreases significantly as the number of door leaves increase. A single control box may power up to two pairs of doors simultaneously making it a cost-effective solution for single or multi-door applications. This flexibility results in significant savings in material and installation costs.

# **■** Quiet Operation

Since the pneumatic automatic operators are powered by pressurized air, they are quiet, efficient, and very reliable. Flexible LCN pneumatic tubing is the only connection between the control box and the door frame. There is no need for high-voltage wiring at the door frame since all of the power for operation is generated by pressurized air located away from the door frame. (Note: special fittings are available so 3/16" metal tubing (by others) can be used in fire rated plenums).

# ■ Pneumatically (Air) Powered

All pneumatic automatic operators require a compressed air source. LCN's pneumatic systems have the flexibility to run as an independent unit (7980 Series has a compressor built into the control box) or to run off an existing air supply (7900 Series has connections for utilizing existing air supply). Using a self-contained 7980 Series control box for single or double door leaf applications eliminates the need for an independent compressor. Existing building air compressors with a storage tank can be used to reduce the cost of multi-door systems and must utilize the 7900 Series control boxes.

# ■ Easy Adjustment/Installation

The air pressure and timing cycle are easily adjustable to meet the need of a specific installation. Because the control box can be located anywhere within 100 linear tubing feet from the controlled door for the 7900 Series or within 50 linear tubing feet for the 7980 Series, they can be placed in easily accessible locations. Convenient features such as sequential operation of vestibule doors are available.

# ■ Multiple Mounting Configurations

Available in three different mounting configurations:

- Concealed in the frame (2610 Series).
- Top Jamb Surface Mounted on the pull side of the door (4810 Series).
- Top Jamb Surface Mounted on the push side of the door (4820 Series).
- Door Mounted, Parallel Arm on the push side of the door (4840 Series).

#### ■ Hazardous Location Use

Since there is no high-voltage wiring at the door frame, pneumatically powered systems are ideal for use in hazardous areas. The control box, which contain the valves and electrical timing circuits, is remotely located outside the hazardous area.

#### ■ Blow-Open (Smoke Evacuations Systems)

An auxiliary "blow-open" box is available and is controlled by the building smoke evacuation system to allow fresh air into the building. When activated, the normal pneumatic power operator functions are not available. The 7949 Series "blowopen" box works with or without the 7900 Series control boxes. (Limited to 50 linear foot of tubing).

# STANDARDS, LISTINGS & APPROVALS

- UL listed for self-closing doors without hold open under "SWINGING DOOR CLOSERS (GVEV)" file R1943.
- Tested and certified under ANSI Standard A156.19. Refer to Section 2.1 and consult factory for details.
- ANSI Standard A117.1. Section 4.13.13.
- ADA law. Section 4.13.12.
- UL 10B and UL 10C listing.
- Consult the factory for other listings

#### WARRANTY

 2 year limited warranty. See General Information Section for complete details.

# STANDARDS, LISTINGS & APPROVALS

- Operators mounted according to the LCN installation instructions require no periodic maintenance or adjustments.
- Periodic visual inspections are recommended.
- Inspect and service filter assembly in 7900 Series control boxes as required.
- No service contracts.

# Typical Pneumatic Powered Systems

These pages illustrate examples of typical Pneumatic LCN systems. Please consult your local SSC representative or LCN for assistance with specific installations and material requirements.

# SINGLE INTERIOR DOOR SYSTEM (WIRED)

- Slow opening interior door leaf
- System may be expanded to include an additional simultaneous door
- No guide rails or safety devices

#### **How It Works:**

- A person requiring assistance triggers the system using either actuator.
- The control box supplies pressurized air to the Auto Equalizer which opens the door slowly to 90°, holds it for up to 30 seconds, then applies full spring power to reliably close and latch the door
- If not actuated, the Auto Equalizer functions as a full featured door closer

Qty.	Part No.	Description
1	4811	Auto Equalizer
1	8310-856	Actuator (exterior)
1	8310-856	Actuator (interior)
1	7901	Control Box

(as needed)	925	Tubing
	1 1 1 1	1 4811 1 8310-856 1 8310-856 1 7901 1

<sup>\*</sup> Contact Technical Support to verify compressor requirements.

# SINGLE INTERIOR DOOR SYSTEM (WIRELESS)

- Slow opening automatic door on door leaf
- Wireless actuators
- Stand alone system, no planned expansion
- No guide rails or safety devices

#### **How It Works:**

- A person requiring assistance triggers the system using either actuator
- The wireless transmitter in the actuator sends a signal to the wireless receiver which triggers the control box
- The control box supplies pressurized air to the Auto Equalizer which slowly swings door to 90°, holds it for up to 30 seconds, then applies full spring power to reliably close and latch the door.
- If not actuated, the Auto Equalizer functions as a full featured door closer

<b>Bill Of Materials:</b>	Qty.	Part No.	Description

	(as needed)	925	Tubing

These pages illustrate examples of typical Pneumatic LCN systems. Please consult your local SSC representative or LCN for assistance with specific installations and material requirements.

#### ALTERNATE VESTIBULE DOOR SYSTEM (WIRED)

- Slow opening automatic doors with sequential operation for exterior and vestibule pairs of doors
- No guide rails or safety devices

#### **How It Works:**

- People requiring assistance press exterior actuator for entry
- The exterior pair opens and after a short sequential delay the interior pair opens
- As the system times out, first the exterior, then the interior doors close
- Pressing the interior actuator reverses the process to exit the building
- This allows passage through the vestibule without all doors open for the entire cycle
- If a person stops in the vestibule and the system times out before they exit, pressing either vestibule actuator opens the appropriate doors
- Compressor is sized for multiple systems. Sequential operation is not recommended with scanners or motion
- If not actuated, the Auto Equalizer functions as a full feature door closer

<b>Bill Of Materials:</b>	Qty.	Part No.	Description
	2	4822	Auto Equalizer (exterior)
	2	4811	Auto Equalizer (interior)
	1	7902S	Control Box with
			Sequencer Card

	4	8310-856	Actuator
	(as needed	) 925	Tubing

<sup>\*</sup> Contact Technical Support to verify compressor requirements.

#### **VESTIBULE DOOR SYSTEM (WIRELESS)**

- Slow opening automatic doors with sequential operation for single exterior and vestibule doors
- No guide rails or safety devices

#### **How It Works:**

- People requiring assistance press exterior actuator for entry
- The exterior door opens and after a short delay the interior door opens
- When the system times out, first the exterior, then the interior door closes
- Pressing the interior actuator reverses the process to exit the building
- This allows passage through the vestibule without both doors open for the entire cycle
- If a person stops in the vestibule and the system times out before they exit, pressing either vestibule actuator opens the appropriate door
- Sequential operation is not recommended with scanners or motion sensors
- If not actuated, the Auto Equalizer functions as a full featured door closer

<b>Bill Of Materials:</b>	Qty.	Part No.	Description
	1	4822	Auto Equalizer (exterior)
	1	4811	Auto Equalizer (interior)
	1	7982S	Control Box with
			Sequencer Card

- For abusive applications features forged solid steel main arm and forearm with spring loaded stop in soffit shoe
- Optional

**G25** 

### **Installation accessories**

#### 4840-30 CUSH Shoe Support

 Provides anchorage for fifth screw used with EDA and CUSH arms, where reveal is less than 3-1/16" (78 mm)

#### 4840-61 Blade Stop Spacer

 Required to lower parallel arm shoe to clear 1/2" (13 mm) blade stop

#### 4840-419 PA Flush Panel Adapter

 Provides horizontal mounting surface for parallel arm shoe on single rabbeted or flush frame

#### 4840-459 Door Loop Kit

- Surface mounted, flexible metal loop transfers pressurized air via pneumatic tubing from frame to closer end cap
- Extra caps allow tubing to run on frame surface or concealed in the frame.

4840-460 Pneumatic Transfer Hinge

- Transfers pressurized air via pneumatic tubing from frame to door leaf for fully concealed installations
- Preparation of a raceway is required from the hinge stile of the door to the top rail for concealment of the pneumatic tubing within the door leaf

Minimum door width				

#### Interior door width

Indicates recommended range of door width for closer size.

# **CONTROL BOXES**

Heavy duty, surface mounted control box contains one or two electrically controlled pneumatic circuits. Air filtration, pneumatic regulation, and system timing is performed by the control box. 7980 Series control boxes also contain a built-in air pump to power the system. Each pneumatic circuit can be adjusted for a hold open time up to 30 seconds. Output air pressure can be adjusted to precisely tailor system to individual door requirements.

Pneumatic connections use standard barbed fittings and 925 tubing from the compressor to the control box to the operator. A package of barbed tee and butt connectors are supplied with each control box to simplify installations. Consult LCN for details. Other than a semi-annual inspection of the air filter assembly and muffler, no periodic system maintenance is required.

#### 7901 AND ES7901 CONTROL BOX

- For single door applications or independent control of single door in multiple door systems
- Two door leaves can be operated, if they are activated simultaneously
- The single pneumatic circuit accepts Normally Open (N.O.) inputs from hardwired or RF (wireless) actuator/receiver combinations
- The 7901 control box requires a separate compressor

#### 7902 AND ES7902 CONTROL BOX

- For independent operation of two door or four door leaves, if pairs are actuated simultaneously
- Two independent pneumatic circuits accept Normally Open (N.O.) inputs from hardwired or RF (wireless) actuator/receiver combinations
- Sequential operation (add suffix "S") is available for 7902
- The 7902 control box requires a separate compressor

#### 7981 AND ES7981 CONTROL BOX

- Self-contained control box/compressor combination for single door leaf applications
- The single pneumatic circuit accepts Normally Open (N.O.) inputs from hardwired or RF (wireless) actuator/receiver combinations
- The 7981 control box does not require a separate compressor

#### 7982 AND ES7982 CONTROL BOX

- Self-contained control box/compressor combination for independent or simultaneous operation of two door leaves
- Two independent pneumatic circuit accepts Normally Open (N.O.) inputs from hardwired or RF (wireless) actuator/ receiver combinations
- The 7982 control box does not require a separate compressor.
- Sequential operation (add suffix "S") is available for 7982 control boxes

#### 7949 and Es7949 Control Box

- Auxiliary "blow-open" box works with or without 7901 or 7902 and one or two Auto Equalizers
- Controlled by smoke evacuation system, the 7949 open the door(s) to allow fresh air into the building
- Normal Auto Equalizer functions are not available when "blowopen" box is activated

#### **Optional "ES" Boxes**

- Identical in function(s) to the basic box but includes an isolated (SPDT) relay with 1 set of Normally Open (N.O.) and Normally Closed (N.C.) contracts to control an electric strike
- The LCN control box cannot power the strike. ES7949 has two sets of isolated (DPDT) contacts. Compressor size recommendations are based on normal usage for the number of operations listed
- All LCN supplied auxiliary compressors include an automatic drain feature

#### **Control Box Installation Notes**

- Locate a 7900 Series control box so no more than 100 linear feet of LCN 925 pneumatic tubing is required between the control box and door. Maximum 50 linear feet for a 7980 and 7949 Series
- Locate a 7900/7980/7949 Series control box where the temperatures do not exceed 120°F or fall below 35°F
- 7901, 7902 and 7949 control box input 120V AC @ 1 amp. 7981 and 7982 control boxes input 120V AC @ 5 amp
- Output voltage is 12V DC @ 0.25 amp. max
- Air pressure input, 80 PSI minimum/100 PSI maximum, required for 7901, 7902 and 7949
- Regulated air output up to 80 PSI for Auto Equalizer
- Auto Equalizers require approximately 0.5 cfm airflow in heavy traffic
- All control boxes are 15" x 15" x 6"

#### -929

#### Filter and Seal

 Internal filter and seal component to the Air Filter -329G assembly

#### -900

#### **Power Supply Board**

 Main power supply/input board for the 7901, 7902, 7981, or 7982 Series control boxes

#### -903 Timer Card

- 0 to 30 second timer module
- Plugs into the power supply board, -900. 7901 (A slot)
   Series control box requires 1 each.
- 7902 (A/B slots) and 7981 (P/A slots) Series control boxes require 2 each
- 7982 (P/A/B slots) Series control box requires 3 each

#### -3426 Sequencer Card

- Dual, 0 to 30-second sequence timer module for 7902 and 7982 Series control boxes
- Can be added to a standard 7902 or 7982 Series control box to convert to a sequential operation.
- Sequencer card, -3426 is included when ordering a 7902S or 7982S Series control box

#### -941 Valve Assembly

 Regulator valve assembly for 7901 Series control box

# Valve Assembly

 Regulator valve assembly for 7902 Series control box

#### -941C Valve Assembly

 Regulator valve assembly for 7949 Series blow open control box

#### -3299A

# Solenoid Valve Assembly

Air valve assembly for 7981
 Series control box or the 'A' circuit valve assembly for the 7982 Series control box

#### -3299B

#### Solenoid valve assembly

 Air valve assembly for the 'B' circuit in the 7982 Series control box

# 7900 Series Control Boxes

Accessories

#### **Accessories**

#### -3390A Relay Package "A"

- ES relay assembly for 7901 and 7981 Series control boxes or the 'A' circuit ES relay assembly in a 7902 or 7982 Series control boxes
- Includes 390 relay, base, and wires
- Can be added to standard 7901, 7902, 7981, or 7982 Series control boxes to convert to ES operation
- Relay package, -3390A is included when ordering a 7901ES, 7902ES, 7981ES, or 7982ES Series control box

-3390B Relay Package "B"

- ES relay assembly for 'B' circuit in 7902 or 7982 Series control boxes
- Includes –390 relay, base, and wires
- Can be added to standard 7902 or 7982 Series control boxes to convert to ES operation
- Relay package, -3390B is included when ordering a 7902ES or 7982ES Series control box

-3390C Relay Package "C"

- ES relay assembly in 7949 Series blow open control box
- Includes –390C relay, base, and wires
- Can be added to standard 7949
   Series blow open control box to convert to ES operation
- Relay package, -3390C is included when ordering a 7949ES Series control box

#### -962 Isolator

 Rubber Isolators for 7981/7982 compressor assembly, -3960

#### -293G Muffler

Exhaust muffler for 7901, 7902, 7949, 7981, and 7982 Series control boxes

#### -3960 Compressor Assembly

- Internal air pump assembly for 7981 or 7982 Series control box
- Includes starter capacitor, -962
   Isolators, and -329 air filter

#### -3592 Compressor Service Kit

 Internal components for pressure release valve on –3960 Compressor Assembly

# 925 Pneumatic Tubing

- 1/8" (3mm) I.D. flexible pneumatic tubing for use with standard barbed fittings provided on pneumatic control boxes and operators
- Order by linear footage required
- 925 tubing is not fire-rated
- Contact LCN for applications where tubing must run through rated plenums

**G31** 

# Electrohydraulic Powered Systems

#### **ELECTRIC AUTO EQUALIZERS**

These Auto Equalizer products are an addition to the original pneumatic drive system. People moving through a door can use it as a normal rack & pinion door closer or, at the touch of a button, open the door automatically. An integrated digital control suite provides all electrical control functions. These self-contained units are suitable for use on single leaf doors or pair of doors where each leaf is equipped with an operator. The operator provides all the control and power elements into a single operator package, only some actuators are required to complete the system.

- Introduced in 1995.
- Two surface mount models available. The 4630 mounts on the pull side of the door and the 4640 Series mounts on the push side of the door.
- Integrates a modified heavy-duty 4040 Series cast iron cylinder.
- 4600 Electric Operators are not approved for smoke evacuation systems.

#### **UNIQUE FEATURES**

#### ■ Digital Control Box

Provides exceptionally precise control of a large range of built-in functions combined with superior durability and performance. Visual indications and digital readouts of all control function settings and activity make adjustments easy, fast and accurate.

#### ■ Dual Independent Program Memories

Each unit is pre-programmed to factory default settings. The installer can adjust the unit to meet the job site requirements. These field settings are locked into the computer's memory. Any subsequent field adjustments replace the original field adjustments. The factory settings are always retained in memory and can be recalled to replace the field settings in just seconds, restoring the unit to it's original programming.

#### On-Board Diagnostics

Sophisticated built-in diagnostics program monitors the system microprocessor, power supplies, drive system and actuators circuitry. Reduces the time required to make sure the installation is complete and correct.

#### On-Board Power Supply

Provides both 12V DC and 24V DC outputs to power card readers, manual actuators and other peripherals.

#### ■ "No Destruct" Drive System

Specially designed motor and clutch assembly provide a 'breakaway' function that reduces the chance the operator will be damaged in an abusive application. If a vandal tries to force the door closed while it is trying to open, the clutch mechanism prevents damage. The door is never out of control because the heavy duty 4040 closer is always operable.

#### ■ Electronic Circuit Protection

The high voltage input circuit is protected by a one amp slow blow fuse. The low voltage output circuits by self-resetting fuses.

#### ■ Visual Function Indicators

LED's allow direct observation of these inputs:

- input power
- fire alarm input
- normal trigger (actuator) input
- sequential trigger (actuator) input
- hold open/alternate action (actuator) input
- lockout timer
- safety sensor (clear) input
- safety sensor (active) input

#### Programming Mode

Allows tailoring the following functions to meet specific site conditions:

- hold open time
- 90° slow down time
- one shot input [ON or OFF]
- Exterior mode [ON or OFF] function to accommodate momentary resistance, like wind gusts, during the opening swing.
- electric strike delay timer
- electric strike 3 second power function [ON or OFF]
- sequential trigger delay timer
- alternate action timer
- lockout timer

#### **ELECTRIC AUTO EQUALIZER SYSTEMS**

- Originally introduced in 1995.
- Exceeds proposed ANSI cycle test standard of 300,000 full load automatic operating cycles. Integrated LCN 10 million cycle heavy duty 4040 door closer.
- Power operation plus full door control.
- For all applications, single or multi-door projects.
- Opening time to backcheck no faster than 3 seconds.
- Opening time 4 seconds or more to fully open.
- Must remain fully open for at least 5 seconds.
- Closing time from 90° to 10° no faster than 3 seconds.
- Less than 15 pounds-force to stop door's motion.
- Kinetic energy must not exceed 1.25 lbf-ft.
- In event of failure; less than 15 lbf. to release latch, less than 30 lbf. to put door in motion, less than 15 lbf. to fully open door systems.

# STANDARDS, LISTINGS & APPROVALS

- UL listed for Fire Door Operator (GUJY) and Door Operator System (+DDR) file R18222.
- Tested and certified under ANSI Standard A156.19. Refer to Section 2.1 and consult factory for details.
- ANSI Standard A117.1. Section 4.13.13.
- ADA law, Section 4.13.12.
- Listed for positive pressure plus UL 10B and UL 10C.
- Wiring is compliant with both UL 325 and the NEC. Separation of high and low voltage.
- Consult the factory for other listings such as; State and Local Government regulations.
- UL 10 C Listed for Fire Rated Door Operators with Automatic Closers, File No. (GUJY).

#### WARRANTY

■ 2 year limited warranty. See General Information Section for complete details.

#### **MAINTENANCE**

- Operators mounted according to the LCN installation instructions require no periodic maintenance or adjustments.
- Periodic visual inspections are recommended.
- No service contracts.

**G33** 

# Electrohydraulic Powered Systems

This page illustrates examples of typical Electric LCN systems. Please consult your local SSC representative or LCN for assistance with specific installations and material requirements.

#### SINGLE DOOR SYSTEMS

#### SINGLE DOOR SYSTEM (WIRELESS)

- An Interior Door
- No guide rails or safety devices
- Free Swinging (or Dogged) Door

#### **How It Works:**

- Wireless RF actuators and receiver, powered by the Auto Equalizer simplify installation and minimize installation costs
- For automatic door operation, touching either actuator signals the receiver and controller module to open the door to 90°
- The door is held there until the system times out, then full spring power is applied to reliably close and latch the door.
- Door opening speed and hold open time are adjustable on the controller
- Closing power and speed are adjustable on the cylinder assembly
- If not actuated, the Auto Equalizer functions as a full featured door closer

Bill of Materials:	Qty.	Part No.	Description
	1	4631	Auto Equalizer
	2	8310-3856WS	Wireless Actuators
	1	8310-865	Wireless Receiver

#### **VESTIBULE ENTRY OPERATION**

#### **VESTIBULE ENTRY SYSTEM (WIRED)**

- Exterior & Vestibule doors
- Sequential Operation
- No guide rails or safety devices
- Controlled Access, Free Egress

### **How It Works:**

- This installation provides both accessibility and security for building occupants
- The Auto Equalizer controller module provides both the power and coordination for card reader and electric strike applications
- A built-in delay allows the strike to release before the door begins to open
- Two interconnected Auto Equalizers provide sequential operation in both directions
- Vestibule actuators allow single door ingress/egress from the vestibule as needed

NOTE: An EL device requires a separate power supply. If not actuated, the Auto Equalizer functions as a full featured door closer

<b>Bill of Materials:</b>	Qty.	Part No.	Description
	1	4642	Auto Equalizer (exterior)
	1	4631	Auto Equalizer (interior)
	3	8310-856	Wall Plate Actuators
	Othe	r products fro	om Von Duprin and
	Lockr	netics	

#### 1-DOOR CLOSER ASSEMBLY

- Based on a heavy duty 4040, cast iron cylinder with allweather fluid for consistency and reliability
- Rugged drive mechanism provides the connection to the electric motor assembly
- Fully adjustable, independent hydraulic regulation controls the door to minimize the chance of damage to the door and frame assemblies

### 2 - ELECTRIC MOTOR/CLUTCH ASSEMBLY

- Highly efficient motor combined with a custom designed gear system provides exceptionally quiet and smooth operation
- Special clutch transmits the power and provides a unique "breakaway" function that prevents damage to the operator, door and frame if a vandal forces the door closed during the powered opening swing

# 3 - DIGITAL CONTROLLER MODULE

- Digital Control Suite
- Dual Independent Program Memories
- On Board Diagnostics
- Visual Function Indicators
- Adjustable Programming Modes

#### 4.X - FIELD WIRING

#### 4.1

- Input power; 120V AC @ 1.5 amperes
- On-board, low voltage power supply provides both 12V and 24V DC @ 1.0 ampere (maximum combined load) for LCN actuators, RF receivers, and electric strikes or magnetic locks
- Slow blow and self-resetting fuses protect input and output power from voltage spikes
- Terminal strips simplify field wiring

#### 4.2

On/Off Switch

#### 4.3

Hold Open Switch

#### 4.4

 Separate conduits for high voltage power and low voltage power and signal wiring meet UL and National Electrical Code requirements

**G35** 

LCN DIGITAL CONTRO	LBOX
Opening Speed Adjustment	Limited to a minimum of 3 seconds to backcheck (approx. 70°)
Opening Force Adjustment	Maximum of 15 lb-f to stop door swing

#### **ELECTROMECHANICAL AUTOMATIC OPERATORS**

LCN's electromechanical products are designed primarily for automatic opening applications that occasionally require manual opening. A control box provides all electrical functions. These self-contained units are suitable for use on single leaf doors or pair of doors. These products combine all the control and power elements into a single operator package, only some actuators are required to complete the system.

- Surface mounted and overhead concealed mountings available.
- Available in two standard anodized finishes Aluminum and Dark Bronze.

# LOW ENERGY ELECTROMECHANICAL POWER OPERATORS

- Complies with ANSI 156.19.
- Opening time from full close to backcheck is no faster than 3 seconds.
- Less than 15 lbs of force to open door manually.

#### STANDARDS, LISTINGS & APPROVALS

- UL listed for self-closing doors without hold open. UL 325.
- Tested and certified under ANSI.
- Low Energy Electromechanical Operators ANSI 156.19.
- ADA Compliant.
- Wiring is compliant with both UL 325 and the NEC. Separation of high and low voltage.
- Consult the factory for other listings.

#### **WARRANTY**

 2 year limited warranty. See General Information Section for complete details.

#### **MAINTENANCE**

Low Energy Electromechanical Power Operators

- Operators mounted according to the LCN Installation instructions require no periodic maintenance or adjustments.
- Periodic visual inspections are recommended.
- No service contracts.

This page illustrates examples of typical Electromechanical LCN systems. Please consult your local SSC representative of LCN for assistance with specific installations and material requirements.

#### SINGLE DOOR SYSTEM (WIRELESS)

- An interior door
- Guide rails or safety devices not required
- Free swinging (or dogged) door

#### **How It Works:**

- Wireless actuators with receiver, powered by the transformer allows for easy installation
- For automatic door operation, touching either actuator signals the receiver and power operator to open the door to 90 degrees
- The door is held there until the system times out
- Door closes via spring return
- Door opening speed, closing speed and hold open time is adjustable on the control box
- If not actuated, the power operator functions as a manual door

<b>Bill Of Materials:</b>	Qty.	Part No.	Description
	1	9531	Automatic Operator (RH)
	2 8	310-3853W	S Wireless Actuators
	1	8310-865	Wireless Receiver

#### **VESTIBULE ENTRY OPERATION**

#### **VESTIBULE ENTRY SYSTEM (WIRED)**

- Exterior & vestibule doors
- Sequential operation
- Guide rails or safety devices not required
- Controlled access, free egress

#### **How It Works:**

- This installation provides both accessibility and security for building occupants
- It allows for the integration of multiple automatic operators, a card reader and electric strike
- A sequencer allows sequential operation of the two automatic operators
- Vestibule actuators allow single door ingress/ egress from the vestibule as needed
- If not actuated the power operator functions as a manual door

#### CONTROL BOX - 2800, 9500 SERIES

- 1. Control Box, 115VAC 60Hz, or 240 VAC 50/60 Hz
- 2. Seven Segment Display
- 3. Power Indicator
- 4. Factory Default Push Button
- 5. Model Identification Label
- 6. 6-Pin Connector for Master Motor
- 7. 3-Pin Connector for 3 Position Switch
- 8. Breakaway Jumper Cable
- 9. 2-Pin Connector for Breakaway Switch
- 10. Accessory Direct Connect Diagram
- 6-Pin Connector for Companion Motor (supply only w/ simultaneous pairs)
- 12. Value Adjustment Push Buttons
- 13. Setting Adjustment Menu
- 14. Function Adjustment Push Buttons
- 15. Closing Speed Adjustment Dial (Master)
- 16. Closing Speed Adjustment Dial (Companion)
- 17. 3-Pin Connector for AC power

#### STANDARD CONTROL BOX - 9100 SERIES

#### **GENERAL ELECTRICAL DATA**

- 1. The 115/240 volt power supply must be a dedicated circuit from the main circuit breaker panel and must not be connected into a building lighting system operating fluorescent lights.
- 2. Location of conduits determined by mounting. See installation instructions for location.

#### 2800, 9500, SERIES

#### **Electrical Data**

- 1. 120 VAC 60Hz input @ 2.5 amps (2800 and 9500 Series).
- 2. 240 VAC 50/60 Hz @ 2.5 amps (2800, and 9500 Series).
- 3. 24 V AC output @ 1.5 amps (protected by self-resetting thermal fuse).
- 4. 24 V DC available with SO kit included.

# **9100, SERIES**

#### **Electrical Data**

- 1. 120 VAC input @ 1 amp.
- 2. 24 VDC output @ 2.5 amps.

**G53** 

# Benchmark Unique Features

# **On-Board Power Supply**

Provides 24V DC output to power card readers, manual actuators and other peripherals.

#### **Electronic Circuit Protection**

Fused input circuit protection and fused output protection for 24 VDC peripherals.

# **Visual Function Indicators**

There are 2 LED's for installation and trouble shooting feedback. The motor LED will illuminate when the motor drive circuit energizes. This is when the operator is activated it will remain on only during the opening of the door and the power LED this will illuminate when power is applied to the board and remains illuminated as long as there is power applied to the board.

# **Programming Mode**

Allow tailoring of the following functions to meet specific site conditions:

- Power Boost
- Opening Speed
- Backcheck Speed
- Hold Open Time Delay
- Backcheck Position
- Closing Speed
- Latch Position
- Push 'N Go
- Delayed Activation

Features

The 9130 BENCHMARK by LCN is an electrically powered low-energy operator. It provides easy access for people with disabilities, or the elderly. Designed primarily for automatic opening applications that occasionally require manual opening. The BENCHMARK is a cost-effective solution for retrofitting an activated or manual door.

- Standard control box (2 ea)
- Mounting bracket (2 ea)
- -72" metal cover
- Standard arm (2 ea)
- Wood and machine screw pack unless options listed below are selected

### Table of sizes

Notes:

- · For 9150 Benchmark Series
- 72" door width only for full length push double door operator.

#### **Digital Control Suite**

Provides exceptionally precise control of a large range of built-in functions combined with superior durability and performance. Visual indications and digital readouts of all control function settings and activity make adjustments easy, fast and accurate.

#### **Dual Independent Program Memories**

Each unit is pre-programmed to factory default settings. The installer can adjust the unit to meet the job site requirements. These field settings are locked into the computer's memory. Any subsequent field adjustments replace the original field adjustments. The factory settings are always retained in memory and can be recalled to replace the field settings in just seconds, restoring the unit to its original programming.

#### **On-Board Diagnostics**

Sophisticated built-in diagnostics program monitors the system microprocessor, power supplies, drive systems, actuators and safety circuits. Reduces the time required to make sure the installation is complete and correct.

#### **On-Board Power Supply**

Provides 24V AC output or 24V DC output with rectifier to power card readers, manual actuators and other peripherals.

#### **Plug and Play Sensors**

Motion sensors and safety sensors feature a "plug and play" concept allowing fast and accurate wiring connections in only seconds.

#### **Electronic Circuit Protection**

High voltage (primary AC input) is protected by replaceable fuse. Low voltage (secondary AC output) is protected by self-resetting fuses.

#### **Visual Function Indicators**

LED Display allows direct observation of these inputs while in visual function indicator mode:

- Key switch- set to Auto, OFF or HOLD
- Activate
- DMSS approach
- DMSS safety
- Bodyguard
- Power Boost Disable

#### **Programming Mode**

Allows tailoring the following functions to meet specific site conditions

- Opening Speed
- Backcheck Speed
- Backcheck Position
- Hold Open Delay
- Latch Position
- Auto Reverse Closing
- Electric Lock Delay
- Power Boost
- Push N' Go
- Alternate Action
- Safety Slow/Stop
- Slow Down Disable

#### Push 'N Go

Allows pedestrians to walk up to the door and push it open as if it were a manual door. After the door is manually opened approximately 5 degrees, the Push 'N Go feature takes over and continues to open the door – slowly and automatically to the full open position. With Push 'N Go, the door will stay fully open from one to 30 seconds, depending on the time delay chosen.

#### **Auto Reverse**

A safety feature that reverses the direction of the door when it comes into contact with an object during either opening or closing.

#### **Safety Slow/Stops Function**

Once the door starts opening, any person or object entering the swing area will cause the door to go into a safety slow speed. This function can be set to allow for a short stop once a person or object is sensed.

#### **Power Boost**

Adds an additional latching force to ensure secure latching in severe wind or stack conditions. Power Boost is also ideal for overcoming slowing obstacles such as electric strikes. Provides approximately 25 lbs. of total closing force.

#### Microprocessor

Control unit allows for quiet efficiency in operation. Combined with the all electromechanical unit, it eliminates unnecessary wear and prolongs the life of the unit.

#### **Electric Lock Delay**

Causes a 1 second delay between activate signal and door opening to allow time for most electric locks to disengage before operator opens door.

### Notes

The 2810 SENIOR SWING by LCN is an ADA door operator that is a two-in-one swing door operator. SENIOR SWING operator when activated, opens doors automatically for wheelchair access, yet allows for manual operation for regular pedestrian traffic.

- Electronic controlling device for Senior Swing

#### Headers

2810-3572HL Header

- Standard
- Single door, single operator
- Specify length 33" to 49" maximum

2810-3572DD Header

- Standard
- Double door, single operator
- Specify length 49" to 98" maximum

### **End Cap**

2810-334 Header End Caps

Wth openings for wiring

#### **Arms**

#### 2810-3077CP Center Pivot Arm

- Center pivot installations only
- Used with overhead concealed operators and center pivoted doors

#### 2810-30770P Offset Pivot Arm

- Offset pivot or butt hung installations only
- Used with overhead concealed operators

#### 2810-3077 OPCM Offset Pivot Arm Assembly

 Offset arm with track and concealing channel (includes 3072 concealing channel, 168 slide channel and 30770P offset pivot arm)

**G76** 

#### **Channels**

#### 2810-3072 Concealing Channel

- Used to conceal arm in overhead concealed applications
- For offset pivot installations only
- If ordering separately specify length and hand

#### 2810-168 Slide channel

- Offset pivot or butt hinge installations only
- Mounts in top rail of door
- Allows arm to slide

#### **Installation Accessories**

2810-384B Door Stop Breakaway

- Allows in-swinging door to swing out in case of emergency
- Disables operator in breakaway mode.
- For center pivoted installations

2810-384F Door Stop Fixed

- Prevents out-swinging door from swinging in
- For center pivoted installations only

#### **Pivots**

#### 2810-3107 **Bottom Pivot Assembly**

- Includes pivot body, pivot post and bottom pivot plate
- For overhead concealed, center pivoted installations
- Includes; 2810-107, 2810-110 and 2810-117

# **Bottom Pivot Body**

For center pivoted installations

#### 2810-12 Filler Plate Blank

Completes length of header

#### 2810-11A Spindle Plate

- Hides bottom of motor gearbox
- Completes header box
- Cutout allows for motor gearbox shaft
- For 2-3/4" center pivot installations

#### 2810-110 Pivot Post

Connects pivot body to bottom pivot plate for center pivoted installations

**Bottom Pivot Plate** 

Applied to floor for center pivoted installations

- Hides bottom of motor gearbox
- Completes header box
- Cutout allows for motor gearbox shaft
- For 3-3/4" offset pivot, butt hinge or center pivot with finger guard installations

- · Adjustable hold open time of 1-32 seconds
- · Actuators available separately, see pages 115-131

#### **Motor Gearbox**

2850-3454 **Motor Gearbox** 

- Senior swing
- Driving mechanism for operator
- Provides maximum 15 lbs opening force
- Handed

#### **Mount Brackets**

#### 2850-375 **Mounting Bracket**

- Motor gearbox mounting bracket for 3-3/4" offset pivot, butt hinge or center pivot with finger guard installations
- Front bracket

2850-275 **Mounting Bracket** 

- Motor gearbox mounting bracket for 2-3/4" center pivot installations
- Front bracket

2850-3018 **Rear Mounting Bracket** 

- Motor gearbox mounting bracket
- Rear bracket

#### **Control Box**

2850-3462 Control box

- Senior swing
- Electronic controlling device for Senior Swing

2850-982 Companion Cable

- Cable that allows one control box to run two motor gearboxes
- For use with Senior Swing

#### Header

#### 2850-3572HL Header

- Mounting header
- Pair door, two operators
- Specify length 52" to 98" maximum
- Standard

#### **End Cap**

#### 2850-334 **Header End Caps**

End cap with openings for wiring

### **Arms**

#### 2850-3077CP Center pivot arm

- Center pivot installations only
- Used with overhead concealed operators and center pivoted doors

#### 2850-30770P Offset pivot arm

- Offset pivot or butt hung installations only
- Handed
- Used with overhead concealed operators

#### 2850-30770PCM Offset Pivot Arm Assembly

- Offset arm with track and concealing channel
- Includes 3072 Concealing Channel, 168 Slide Channel and 30770P offset pivot arm

**G82** 

#### **Channels**

#### 2850-3072 **Concealing Channel**

- Used to conceal arm in overhead concealed applications
- For offset pivot installations only
- If ordering separately specify length and hand

#### 2850-168 Slide Channel

- Offset pivot or butt hinge installations only
- Mounts in top rail of door
- Allows arm to slide

#### **Installation Accessories**

2850-384B Door Stop Breakaway

- Allows in-swinging door to swing out in case of emergency
- For center pivoted installations only

2850-384F Door Stop Fixed

- Prevents out-swinging door from swinging in
- For center pivoted installations only

#### **Pivots**

#### 2850-3107 **Bottom Pivot Assembly**

- Includes pivot body, pivot post and bottom pivot plate
- For overhead concealed, center pivoted installations
- Includes: 2850-107, 2850-110 and 2850-117

#### 2810-107 **Bottom Pivot Body**

Pivot body for center pivoted installations

#### 2850-12 Filler Plate Blank

Completes length of header

#### 2850-11A Spindle Plate

- Hides bottom of motor gearbox
- Completes header box
- Cutout allows for motor gearbox shaft
- For 2-3/4" center pivot installations

#### 2850-110 **Pivot Post**

 Connects pivot body to bottom pivot plate for center pivoted installations

#### 2850-117 **Bottom Pivot Plate**

 Applied to floor for center pivoted installations

### 2850-11B Spindle Plate

- Hides bottom of motor gearbox
- Completes header box
- Cutout allows for motor gearbox shaft
- For 3-3/4" offset pivot, butt hinge or center pivot with finger guard installations

Ordering Information

#### RH double egress

Double egress applications with safety sensors require LCN 9560 series. NOTE: Cannot be used with swing clear hinges, pocket pivots or balanced door.

Butt Hinges	Should not exceed 5" (127 mm) in width	
Reveal for push	Should not exceed 10 " (254 mm) for REGULAR ARM and 20 " (508 mm) for LONG ARM	
Reveal for pull	Should not exceed 4" (102 mm)	
Reveal	Double egress installations should not exceed 4" (102 mm)	
Head Frame	<ul> <li>Minimum 1-3/4" (44 mm)</li> <li>Face frame 6-3/4" (171 mm) total operator clearance</li> </ul>	
Top Rail	Minimum 2-3/4" (70 mm)	
Opening and Closing Time	<ul> <li>Variable by adjustments to the electronic control box</li> <li>Maximum hold open time adjustable up to approximately 32 seconds.</li> </ul>	
System Diagram	See "AUTOMATIC OPERATORS" section page 51 for typical system wiring and page 53 for electrical data	
Maximum Opening	Template allows 90 degree power opening and 90 degree manual opening	

#### Notes:

- · Push N' Go permits non-switch activation with a power boost providing additional latching force
- · Electromechanical unit with microprocessor control
- · Digital keypad for easy setup
- 72" header length is standard. Specify other length 52" 98" (push), specify other length 60" 98" (pull; double egress). Consult factory regarding this option
- · Adjustable hold open period of 2 32 seconds in automatic or manual mode
- · Actuators available separately, see pages 115-131

### **Motor Gearbox**

#### 9550-3454 Motor Gearbox

- Senior swing
- Handed
- Driving mechanism for operator
- Provides maximum 15 lbs opening force

#### **Mount Brackets**

#### 9550-275 Mounting Bracket

- Motor gearbox mounting bracket for 2-3/4" offset pivot or butt hinge installations
- Front bracket

#### 9550-3018 Rear Mounting Bracket

Motor gearbox mounting bracket

#### 9550-334-1 Angled Bracket

 Mounting bracket for surface applications (includes 2 mounting brackets)

### **Control Box**

**9550-3462** Control Box

 Electronic controlling device for Senior Swing

#### 9550-982 Companion Cable

- Cable that allows one control box to run two motor gear boxes
- For use with Senior Swing

#### Header

9550-3572HL

#### Header

- Pair door, two operators
- Specify other length 52" to 98" (Push)
- Specify other length 60" to 98" (Pull; Double Egress)
- Standard

# **End Caps**

9550-334 Header End Caps

With openings for wiring

**9550-334-2** End Dress Plate

Metal finish end cap

### **Tracks**

#### 9550-3038 Track

- Non-handed
- Standard

#### 9550-73 Track End Cap

Black plastic end caps

#### 9550-3034 Roller

Quiet low friction roller assembly

#### **Arms**

#### 9550-3077Plcm Standard Arm Assembly

- Handed
- Includes 3077 regular arm assembly, 3038 track, and 3034 track roller

9550-3077 Regular Arm Assembly

- Handed
- Includes 77 main arm assembly and 79 linkage assembly

#### 9550-3077L Regular Long Arm Assembly

- Handed
- Includes 77 main arm assembly and 79LR linkage assembly

9550-3077T Standard Arm

- Handed
- Track roller not included

#### 9550-77 Main Arm

- Handed
- Attaches to motor gearbox

#### 9550-79 Linkage Assembly

- **15**″
- Threaded rod attaches to door
- Extends from main arm

# Linkage Assembly

- **32**″
- Threaded long rod attaches to door
- Extends from main arm
- Used for reveal 10" to 20"

# **Installation Assembly**

#### 9550-11A Spindle Plate

- Hides bottom of motor gearbox
- Completes header box
- Cutout allows for motor gearbox
- For 2-3/4″ offset pivot or butt hinge installations

#### 9550-12 Filler Plate

- Blank
- Completes length of header box
- Specify length

#### 9550-18 **Mounting Plate**

- Optional mounting plate for standard hollow metal door frames
- Specify length 68-1/2" to 101-1/2" maximum when using angle brackets
- Specify length 65" to 98" maximum when using dress plates.

NOTE: The length of a universal 18 plate will need to be ordered 3-1/2" longer than the supplied header when using angle brackets.

**Auto Operator Actuators &** Accessories

4-1/2" Surface and Flush Mounts

# The actuators and accessories on the following pages are to be used with LCN automatic operators. When using actuators supplied by others, such as card readers, consult the factory.

The desired function, traffic patterns and physical design of the opening will determine the type of actuators used. Generally, for twoway traffic, an actuator is required on both the interior and exterior side of the door. Each actuator is packaged with a decal to be applied to the controlled door. Scanners operate on 12V or 24V AC/DC and may be powered by the LCN electrohydraulic/electromechanical operators. The 7900 series control box requires separate power supply for scanners. Actuators provide normally open (N.O.) dry contacts.

# **Automatic Operator Actuators & Accessories**

8310-856 Wall Mounted Actuator

- Hardwired low voltage actuator with round, stainless steel touch plate in 4-1/2" (114mm) diameter
- Engraved blue filled handicap symbol conforms to most accessibility codes
- Designed to mount in a flush or surface mount box (sold separately) in/on a vertical surface near the controlled door
- Optional mounting in single gang electrical box (by others)
- Heavy industrial grade components provide vandal resistant mounting and weather resistant switch standard

Wall Mounted Actuator

Same as the 8310-856, with the added engraving of "Push to Open"

8310-868F Flush Mount Box

- Rugged Plastic Box, 4-1/2" Round
- Optional accessory can be used w/any 4-1/2" round actuator

8310-868S Surface Mount Box

- Rugged Plastic Box, 4-1/2" Round
- Optional accessory can be used w/any 4-1/2" round actuator

8310-800 Weather/Trim Ring

- Weather/Trim Ring, 4-1/2" Round
- Optional accessory must be used w/any 4-1/2" round plastic mounting box

8310-844 Transmitter

- Transmitter, Wireless, 1 Channel, 9v battery included
- Use to convert standard wall mount actuator to wireless
- Requires 8310-865 Receiver

8310-865 Receiver

- Receiver, Wireless, 1 Channel, w/ Sequencing Feature
- Used in conjunction w/ Wireless Actuators & Transmitter(s)

8310-874 Escutcheon

- Tapered stainless steel escutcheon covers the gap between the wall and the back of the wall plate actuators when mounted in electrical boxes (by others) to minimize cart damage or vandalism
- Optional accessory can be used w/any 4-1/2" round actuator
- Not to be used with wireless function

- Surface Mount Box, 8310-844J (2) Jamb Mount Transmitter, 8310-865 Receiver

# **Automatic Operator Actuators & Accessories**

8310-853 Wall Mounted Actuator

- Hardwired low voltage actuator with stainless steel touch plate in 4-3/4" (121mm) square
- Engraved blue filled handicap symbol conforms to most accessibility codes
- Designed to mount in a flush or surface mount box (sold separately) in/on a vertical surface near the controlled door
- Optional mounting in single gang electrical box (by others) or double gang box (4" x 4" by others) or on an 8310-866 bollard post
- Heavy industrial grade components provide vandal resistant mounting and weather resistant switch standard

8310-853T Wall Mounted Actuator

 Same as the 8310-853, with the added engraving of "Push to Open"

8310-853WP Surface Mounted Actuator

- Wireless, low profile, low voltage actuator with square, stainless steel touch plate in 4-3/4" (121mm) square
- Engraved blue filled handicap symbol conforms to most accessibility codes
- Surface mount box includes integral transmitter w/ battery and actuator switch
- Heavy industrial grade components provide vandal resistant mounting and weather resistant switch standard
- Requires 8310-865 Receiver

8310-853TWP Surface Mounted Actuator

 Same as the 8310-853WP, with the added engraving of "Push to Open"

8310-867F Flush Mount Box

- Rugged Plastic Box
- 4-3/4" Square
- Optional accessory can be used w/ any 4-3/4" square actuator

8310-867S Surface Mount Box

- Rugged Plastic Box, 4-3/4"
   Square
- Optional accessory can be used w/ any 4-3/4" square actuator

8310-801 Weather/Trim Ring

- Plastic Weather Ring, 4-3/4" Square
- Optional accessory can be used w/ any 4-3/4" square plastic mounting box

8310-844 Transmitter

- Wireless, 1 Channel, 9v battery included
- Use to convert standard wall mount actuator to wireless
- Requires 8310-865 Receiver

8310-865 Receiver

- Wireless, 1 Channel, w/ Sequencing Feature
- Used in conjunction w/ Wireless Actuators & Transmitter(s)

8310-813
Touchless Wall Mounted Actuator

- Hardwired low voltage actuator with plastic plate in 4-3/4" (121mm) square
- Optional mounting in single gang electrical box (by others) or double gang box (4" x 4" by others)

**Auto Operator** Actuators & Accessories

4-3/4" Square Surface and Flush Mounts

#### **Automatic Operator Actuators & Accessories**

#### 8310-3853WF Flush Mount Kit

- Actuator, 4-3/4" Square, Logo, Wireless
- Includes 8310-853, 8310-844 Transmitter, 8310-867F Flush Box, 8310-801 Weather/Trim Ring
- Requires 8310-865 Receiver (not part of kit)

8310-801 Weather/Trim Ring

Actuator, 4-3/4" Square, Logo, Wireless

Requires 8310-865 Receiver (not part of kit)

8310-3853WS

Surface Mount Kit

### 8310-3853TWF Flush Mount Kit

- Actuator, 4-3/4" Square, Logo, Text, Wireless
- Includes 8310-853T, 8310-844 Transmitter, 8310-867F Flush Box, 8310-801 Weather/Trim Ring
- Requires 8310-865 Receiver (not part of kit)

- Actuator, 4-3/4" Square, Logo, Text, Wireless
- Includes 8310-853T, 8310-844 Transmitter, 8310-867S Surface Box, 8310-801 Weather/Trim Ring

Includes 8310-853, 8310-844 Transmitter, 8310-867S Surface Box,

Requires 8310-865 Receiver (not part of kit)

8310-3857T Surface Mount Kit

- Actuator Package, 4-3/4" Square
- Includes 8310-853T (2) Wall Mount Actuator, 8310-867S (2)
- Surface Mount Box

NOTE: Weather/Trim Rings are sold separately

8310-3857TW Surface Mount Kit

- Actuator Package, 4-3/4" Square
- Includes 8310-853T (2) Wall Mount Actuator, 8310-867S (2) Surface Mount Box, 8310-801 (2) Weather/Trim Ring, 8310-844 (2) Transmitter, 8310-865 Receiver

Auto Operator Actuators & Accessories

4-3/4" Dual Square Surface and Flush Mounts

#### **Automatic Operator Actuators & Accessories**

#### 8310-855 Dual Wall Mounted Actuator

- Hardwired low voltage actuator with dual rectangle, stainless steel touch plate in 4-3/4" (121mm) square
- Engraved blue filled handicap symbol w/ text, conforms to most accessibility codes
- Designed to mount in a flush or surface mount box (sold separately) in/on a vertical surface near the controlled door
- Optional mounting in double gang box (4" x 4" by others) or on an 8310-866 bollard post
- Heavy industrial grade components provide vandal resistant mounting and weather resistant switch standard

#### 8310-867F Flush Mounted Actuator

- Rugged Plastic Box, 4-3/4" Square
- Optional accessory can be used w/ any 4-3/4" square actuator

8310-867S Surface Mount Box

- Rugged Plastic Box, 4-3/4"
   Square
- Optional accessory -can be used w/ any 4-3/4" square actuator

#### 8310-801 Weather/Trim Ring

- Plastic Weather Ring, 4-3/4" Square
- Optional accessory can be used w/ any 4-3/4" square plastic mounting box

8310-844 Transmitter

- Transmitter, Wireless, 1 Channel, 9v battery included
- Use to convert standard wall mount actuator to wireless
- Requires 8310-865 Receiver

#### 8310-865 Receiver

- Receiver, Wireless, 1 Channel, w/ Sequencing Feature
- Used in conjunction w/ Wireless Actuators & Transmitter(s)

Auto Operator Actuators & Accessories

4-3/4" Dual Square Surface and Flush Mounts

# **Automatic Operator Actuators & Accessories**

#### 8310-3855WF Flush Mount Kit

- Actuator, 4-3/4" Square, Logo, Text, Dual Vestibule, Wireless
- Includes 8310-855 Actuator, 8310-844 Transmitter (2), 8310-867F Flush Box, 8310-801 Weather/Trim Ring
- Requires 8310-865 Receiver (2) (not part of kit)

#### 8310-3855WS Surface Mount Kit

- Actuator, 4-3/4" Square, Logo, Text, Dual Vestibule, Wireless
- Includes 8310-855 Actuator, 8310-844 Transmitter (2), 8310-867S Surface Box, 8310-801 Weather/Trim Ring
- Requires 8310-865 Receiver (2) (not part of kit)

#### 8310-3853WB Actuator, Bollard Mount Kit

- 4-3/4" Square w/ Logo, Wireless actuator
- Use w/ 8310-866 Bollard (not included) Includes 8310-853 actuator, 8310-844 transmitter
- Requires 8310-865 Receiver (not part of kit)

#### 8310-3853TWB Actuator, Bollard Mount Kit

- 4-3/4" Square w/ Logo, Text, Wireless actuator
- Use w/8310-866 Bollard (not included) Includes 8310-853T actuator, 8310-844 Transmitter
- Requires 8310-865 Receiver (not part of kit)

Auto Operator Actuators & Accessories

36" x 6" Full Length Actuators

### **Automatic Operator Actuators & Accessories**

#### 8310-836T Full Length Actuator (FLA)

- Hardwired low voltage actuator with stainless steel touch plate with 36" x 6" activation surface
- Blue handicap symbol conforms with most accessibility codes
- Added "PUSH TO OPEN" lettering for enhanced identification
- Designed to meet California building codes and increase accessibility for wheelchair bound entrants
- Can easily be mounted to any flat surface or a bollard post

#### 8310-836TW Flush Length Actuator (FLA)

- Same as the 8310-836T with a built in wireless transmitter and 3v battery
- Use in conjunction with 8310-865 Receiver (not included)

8310-865 Receiver

- Wireless, 1 Channel, w/Sequencing Feature
- Used in conjunction w/ Wireless Actuators & Transmitter(s)

#### 8310-844 Transmitter

- Wireless, 1 Channel, 9v Battery included.
- Used to convert standard actuators to wireless
- Requires 8310-865 Receiver
- Recommended for exterior application with 8310-836T
- Used with the 866FLA bollard post

8310-866FLA FLA Bollard Post

- A powder coated steel 42" x 4" x 6": Bollard Post, mounting base pre prepped for the 8310-836T
- Includes 8310-866 CAP, 2 mounting screws & spacer for installation

8310-3836T FLA Bollard Mount Kit

 36" x 6" Actuator with 8310-866FLA Bollard for wired applications

- 36" x 6" Actuator with 8310-866FLA Bollard and 8310-844 wireless Transmitter
- Transmitter requires 8310-865 Receiver (not included)

**Auto Operator Actuators &** Accessories

Sensors

The sensors and accessories on the following pages are to be used only with LCN automatic operators. When using sensors supplied by others, consult the factory.

The desired function, traffic patterns and physical design of the opening will determine the type of sensors used.

#### **Automatic Operator Sensors & Accessories**

8310-804-1 **Door Mount Safety Sensor** 

 Contains one active sensor module to detect obstruction(s) on leading edge of door

8310-804-2 **Door Mount Safety Sensor** 

Contains two active sensor modules to detect obstruction(s) on full face of door

8310-854 **Header Mount Activation Sensor** 

- Activation Sensor, 'K' Band Technology
- Used to detect objects either approaching or moving away from
- Uses standard 'one way' detection but additional detection can be programmed
- Optional 8310-859 Handheld Remote Control can be used to program 8310-854 sensor from a distance

8310-877 **Header Mount Safety Sensor** 

- Safety Sensor, 'Diffused Infrared' Technology
- Used to detect obstructions during door open and door closed position
- Nine selectable patterns
- 8310-859 Handheld Remote Control required to program 8310-877 sensor from a distance
- Includes 8310-846 Harness

8310-8775 **Header Mount Safety Sensor** Spacer

- Required when 8310-804-1 or 8310-804-2 Door Mount Safety
- Spacers are used w/ 8310-877 Header Mount Safety Sensor

8310-859 Handheld Remote Control

Used to program 8310-877 Header Mount Safety Sensor or 8310-854 **Header Mount Motion Sensor** 

8310-846 **Header Mount Harness** 

Comes with 8310-877 Header Mount Safety Sensor

**Door Mount Harness** 

- Used with 8310-804-1 or 8310-804-2 Door Mount Safety Sensor, must order separately.
- Used with Senior Swing only, must order separately

# **Automatic Operator Sensors & Accessories**

8310-3881L Safety Sensor Package

- Activation/Safety Sensor Package, Single Door
- Includes 8310-854 (2) Header Mount Activation Sensor, 8310-877 Header Mount Safety Sensor, 8310-877S
   Header Mount Spacer, 8310-804-2 Door Mount
- Safety Sensor (approach side), 8310-847 Harness (Used with Senior Swing only)

8310-3881 Safety Sensor Package

- Activation/Safety Sensor Package, Single Door
- Includes 8310-854 (2) Header Mount Activation Sensor, 8310-877 Header Mount Safety Sensor, 8310-877S
   Header Mount Spacer, 8310-847 Harness, 8310-804-2 (2) Door Mount Safety Sensor (approach/safety side)
   (Used with Senior Swing only)

8310-3883 Safety Sensor Package

- Activation/Safety Sensor Package, Low Energy Convenience
- Single Door, Includes 8310-804-1 Door Mount Safety
- Sensor (approach side), 8310-805C Door Position Switch (Concealed), 8310-845 Programmable Relay Module (Used with Senior Swing only)

Auto Operator Actuators & Accessories

**Packages** 

### **Automatic Operator Sensors & Accessories**

#### 8310-3882L Safety Sensor Package

- Activation/Safety Sensor Package, Double Door
- Includes 8310-854 (2) Header Mount Activation Sensor, 8310-877 Header Mount Safety Sensor, 8310-877S Header Mount Spacer, 8310-847 (2) Harness, 8310-804-2 (2) Door Mount Safety Sensor (approach side) (Used with Senior Swing only)

NOTE: Not for use with Double Egress

#### 8310-3882 Safety Sensor Package

- Activation/Safety Sensor Package, Double Door
- Includes 8310-854 (2) Header Mount Sensor, 8310-877 Header Mount Sensor, 8310-877S Header Mount Spacer, 8310-847 (2) Harness, 8310-804-2 (4) Door Mount Safety Sensor (approach/safety side) (Used with Senior Swing only)

NOTE: Not for use with Double Egress

#### 8310-3891 Safety Sensor Package

- Activation/Safety Sensor Package, Health Care I, Simultaneous Pair
- Includes 8310-877 Header Mount Sensor, 8310-877S Header Mount Spacer, 8310-804-2 (4) Door Mount Sensor (approach/safety side), 8310-847 (2) Harness (Used with Senior Swing only)

NOTE: Not for use with Double Egress

#### 8310-3892 Safety Sensor Package

 Activation/Safety Sensor Package, Health Care II, Independent Pair, Includes 8310-877 (2) Header Mount Sensor, 8310-877S (2) Header Mount Spacer, 8310-804-2 (4) Door Mount Sensor (approach/safety side), 8310-847 (2) Harness (Used with Senior Swing only)

# **Automatic Operator Sensors & Accessories**

8310-805 Door Position Switch

- Surface mount
- Used when 8310-804-1 or 8310-804-2 Door Mounted Safety Sensor and 8310-845 Relay Module is installed in conjunction w/ either a electrohydraulic, pneumatic or Benchmark Automatic Operator
- Disables approach side sensor when door is closed

8310-805C Door Position Switch

- Concealed
- Used when 8310-804-1 or 8310-804-2 Door Mounted Safety Sensor and 8310-845 Relay Module is installed in conjunction w/ either a electrohydraulic, pneumatic or Benchmark Automatic Operator
- Disables approach side sensor when door is closed

8310-824 Transformer, 24v,

- Hardwired
- Optional accessory Used to remotely power any 24v sensor/ receiver

8310-824P Transformer

- 24v, plug in
- Optional accessory Used to remotely power any 24v sensor/ receiver

### 8310-854ECA Drop Ceiling Bracket

- Bracket used w/ 8310-854
   Header Mount Activation Sensor
- Optional

8310-854ERA
Protective Cover

- Cover used w/ 8310-854 Header Mount Activation Sensor
- Optional

#### 8310-3803 Wireless Conversion Kit

- Jamb mount, 3v
- Converts standard jamb actuator to wireless version
- Includes 8310-865 Receiver, 8310-844J (2) Jamb Mounted
- Transmitter Requires 8310-819S or 8310-819F Jamb Box

8310-3809 Wireless Conversion Kit

- Jamb mount, 9v
- Converts standard wall mount actuator to wireless version
- Includes 8310-865 Receiver, 8310-844 (2) Wall Mount Transmitter
- Requires Surface or Flush Box and Weather Ring

#### 8310-3889 Safety Module Kit

- Used w/7901, 7902, 7981, 7982
   Control Boxes.
- Includes 8310-3888 Safety
   Module Harness. Required when 8310-877 Header Mount Safety
   Sensor is used w/ Pneumatic
- Automatic Operators (2610, 4810, 4820 or 4840 Series)

#### 8310-3888 Harness

- Safety module, service part
- Safety Module Harness for pneumatic control box

**Auto Operator** Actuators & Accessories

# **Automatic Operator Sensors & Accessories**

#### 8310-861 Transmitter

- Wireless
- 1 Channel, Handheld, 3v. Requires 8310-865 Receiver

#### 8310-862 Transmitter

- Wireless
- 2 Channel, Handheld, 3v. Requires 8310-865 Receiver

#### 8310-863 Transmitter

- Wireless
- 3 Channel, Handheld, 3v. Requires 8310-865 Receiver

#### 8310-864 Transmitter

- Wireless
- 4 Channel, Handheld, 3v. Requires 8310-865 Receiver.

#### 8310-866 **Bollard Post**

- A powder coated steel 42" x 4" x 6" Bollard Post, Mounting Base and 8310-866CAP
- Actuator cut out accepts 8310-3853WB or 8310-3853TWB wireless actuators 4-3/4" square hard wired actuator

#### 8310-866CAP **Bollard Post**

Plastic Cap, Protective Cover, Service Part for 8310-866 Bollard Post

# **Automatic Operator Actuators & Accessories**

#### **8310-806K** Key Switch

- Type, 3 Position (On/Off/Hold-Open)
- Optional switch used w/ Senior Swing, Benchmark, or 4630/4640 Operators with (CS) option

#### 8310-806R Rocker Switch

- Type, 3 Position (On/Off/Hold-Open)
- Optional switch w/ Senior Swing, Benchmark, or 4630/4640
- Operators with (CS) option

# 8310-807 Line Filter

 AC, 120v, Optional filter used w/ Senior Operators to reduce 'line noise'

8310-845 Programmable Relay Module

 Used to sequence door operation in Senior Swing and Benchmark for hard wired applications

8310-887 Retrofit Cable

 Allows newer style Senior Swing digital control to be activated by existing switches when replacing older control purchased prior to September, 2006

8310-3134 Retrofit Cable Kit

- Allows newer style Senior Swing Digital Control to be activated by existing switches when replacing older control purchased prior to September, 2006.
- Also includes cables to allow Safety Sensors to activate
- Includes 8310-887 plus Safety Sensor Cables

# Notes

# **PAH 60** Holder

The PAH 60 is recommended for use on the inactive leaf of a pair of doors where the active leaf has a door closer installed.

Handing	Handed		
<b>Butt Hinges</b>	Should not exceed 5" (127 mm) in width		
Auxiliary Stop	Recommended at hold-open point		
Top Rail	Minimum 2″ (51 mm)		
Rabbet Depth	Minimum 1-1/4" (32 mm)		
Maximum opening	<ul> <li>Hold-open points up to 180°</li> <li>Hold-open point adjustable at the soffit shoe</li> </ul>		

Fasteners	Wood and machine screw pack
Finishes/Colors/ Powder Coat	<ul> <li>Aluminum (689)</li> <li>Statuary Bronze (690)</li> <li>Light Bronze (691)</li> <li>Black (693)</li> <li>Dark Bronze (695)</li> <li>Brass (696)</li> <li>Custom colors optional</li> </ul>
	<ul><li>Optional SRI primer - powder coat only</li><li>Optional plated finishes</li></ul>

# **How-to-order PAH 60 Holder**

# 1. Specify hand

□RH  $\square$  LH
