7000 Series Vertical Rod locks are available for aluminum, wood and metal doors. Single point top latching can also be specified, eliminating the bottom strike and the additional installation work required with a bottom bolt. The single point device is specified with the NB- option.

Rods are retracted by dual mounted controls with a variety of functions available.

The 7000 Series is available for fire rated openings as a 12- for wood or metal doors.

Thermal pin requirements for fire rated doors:

-  Double doors with two point latching on each do not require thermal pins
-  Double doors with single point latching (NB-) on each require a total of 2 thermal pins, one thermal pin (supplied) for each device
-  Not fire rated for single door application

## INNOVATION

- The 7000 Series is available with a variety of electro-mechanical solutions, including bolt monitoring, solenoid activated trim and inside and outside lever monitoring

# Electric Latch Retraction Option (ELR)

SARGENT’s Electric Latch Retraction (ELR) is the perfect choice for high traffic doors that require access control. This non-handed module is durable and easy to install. It utilizes a latch retraction motor rather than a solenoid, ensuring quiet operation ideal for locations such as conference rooms, theaters and libraries. Once retracted, the door functions in a push/pull manner.

The ELR- can be dogged for momentary ingress and egress and is commonly used in conjunction with an automatic door operator. The device can be dogged continuously on fire-rated devices that are tied into the building’s fire detection system.

## ELECTRIC LATCH RETRACTION FEATURES

- 5 year warranty
- Patented
- Field serviceable - modular design
- Supports electrified dogging
- Motor-driven latch retraction for smooth, precise operation
- Amount of latch retraction is automatically controlled by the ELR- circuitry; System actively monitors its position and adjusts itself
- Digital retraction timer (0-20 seconds; factory setting is 0)
- Standard electric hinge - no special power transfer required
- Can be used for continuous and intermittent use
- UL Listed for Class II Circuitry
- Power Requirements: 24 or 12VDC regulated/filtered power supply (LSP-12-24)
- Current draw:
  - 24VDC: 700mA during retraction & 150mA maintained in dogged position
  - 12VDC: 850mA during retraction & 250mA maintained in dogged position
- Available for 7000 series only
- See page 14 for compatible functions
- See McKINNEY’s Transfer Device Solutions Catalog for QC Hinge and cable requirements
- Order as a ELR- option (e.g., ELR-701315 x ETMF x LH x 26D x 96)
