

Router Guide Templates & Template System

ROUTER GUIDE TEMPLATES

SOSS Invisible Hinges now can be installed easier and faster than ever before. Router guide templates are available for hinges as shown on the chart.

A perfect routed outline is foolproof (the only critical dimension is the depth of the shallow mortise), so you can expect a perfect installation every time.

Each router guide template is individually handcrafted for exactness. The template is held on the door and jamb with nails; guide pins locate the deep mortise. The edges of the template assure a perfect outline when used with SOSS RGB100 Template Guide and Lock Nut, or the Porter-Cable Template Guide #42024 (Lock Face Routing) and #42237 (Lock Nut).

CAUTION:

Do not use resharpened bits.

NOTE:

Please visit our website, www.soss.com, for a video on how to use the SOSS Installation Templates and Template Systems to install SOSS Invisible Hinges.

Hinge Model	Router Bit Size	Router Guide Template #	Router Guide Template Compatible with Router Guide System
#101	1/4"	101IT	No
#103	3/8"	103IT	No
#203	3/8"	203IT	No
#204	3/8"	204IT	No
#208	3/8"	208IT	No
#212	3/8"	212IT	Yes
#216	1/2"	216IT	Yes
#218	1/2"	218IT	Yes
#220	1/2"	220IT	Yes
#504	3/8"	504IT	No
#518	1/2"	518IT	No

ROUTER GUIDE SYSTEM EASILY APPLIED TO DOOR AND FRAME

The SOSS Router Guide System saves you time and measurements. The router guide templates can be positioned exactly to the hinge locations desired, and then locked into place. The system, with two, three or four router guides locked into place, can be moved from door to door jamb, thereby eliminating time consuming measurements.

Router Guide Systems (RGS) can be used with two, three, or four of the 212IT, 216IT, 218IT, and 220IT wooden router guides. Router guide systems are not for use on doors taller than 10' tall.

For complete instructions for installation with a router guide system, please visit our website or contact the SOSS office. Complete instructions are supplied with each Router Guide System.
