

CM-332 2 Relay Touchless Switches

CM-332 APPLICATION

2 Relays, Line Powered

Ideal for activation and control of two doors, particularly vestibule applications.

This eliminates the need for a separate door control relay.

Includes option for Light Ring and Wireless Transmitter

The SureWave™ family of touchless switches by Camden lead the industry in performance, quality and value - with a range of features unmatched by any other on the market.

CM-332 touchless switches provide 'state of the art' door activation and control while eliminating the spread of germs.

These line powered touchless switches offer an adjustable operating range, selectable motion sensing and relay operating modes, hold open timer(s), REX and door position inputs, and the option for a light ring and wireless transmitter.
