Due to recent changes in government policies affecting international trade, Bosch Security Systems must adapt to ensure continued business excellence in the US market.

Effective May 12, 2025, we must apply an additional price offset measure on our intrusion and access control portfolios. This measure is necessary to address evolving market conditions and regulatory requirements. We want to assure you that we are well-positioned, working further to minimize this impact.

- More than 95% of product sold is manufactured in our factory in Ovar, Portugal. Portugal is currently less impacted by these government policies, resulting in a 5.2% increase in your price for these products.
- Less than 5% of our portfolio is manufactured in China and while the tariff increase on these products is well over 100%, we are passing on only 55.2% on a small list of products.
- All existing quotations will be honored through their effective dates.
- Our warranty coverage and technical support remain unchanged.
- As a reminder, we will be unable to process or ship orders for our entire portfolio of products between May 1 - May 11 due to our transition from Bosch. This was communicated to customers on March 14. Please place expected orders as soon as possible to ensure processing and shipments are made before May 1.

Please contact your Bosch Security Systems representative with any questions. Your price list has been updated to reflect these changes.

Thank you for your continued partnership and support in these challenging times, and throughout our ownership transfer process.

Yours sincerely,
Bosch Security Systems
